

## 2018 CLABSI Medical Record Abstraction Tool

Refer to associated 2018 MRAT instructions

| 1. IDENTIFIERS AND ABSTRACTED DATA: Use Tables on page 1 to document information as needed to answer questions beginning on page 2.  |                       |  |   |                                      |  |                |                              |
|--|-----------------------|--|---|--------------------------------------|--|----------------|------------------------------|
| State  | Facility (NHSN) OrgID | (circle): ACH / LTACH / CancerH / Other/ |   |                                      | Date of Audit ___/___/___  |                |                              |
| Patient ID   |                       | Patient DOB ___/___/___                  |   |                                      | Reviewer Initials  |                |                              |
| Review Start Time:   |                       | End Time:                                |   |                                      | Time spent reviewing this record (minutes):  |                |                              |
| FACILITY Admission Date: ___/___/___   |                       |  |   | FACILITY Discharge Date: ___/___/___ |  |                |                              |
| 2. SCREENING QUESTIONS   |                       |  |   |                                      |  |                |                              |
| 2-1. Were any positive blood specimens collected on or after facility day 3 or was the date of event (DOE) the day of transfer or discharge, or the next day?  |                       |  |   |                                      | <input type="checkbox"/> Yes -> Continue to 2-2<br><input type="checkbox"/> No -> (i.e., <u>ALL</u> positive blood specimens were drawn <u>before</u> facility day 3) there was no HAI-CLABSI Event. STOP, record outcome (a) No candidate VL CLABSI |                |                              |
| 2-2. Were any positive blood specimens taken during ANY validation location (VL) stay, or on the day of or day after VL discharge?   |                       |  |   |                                      | <input type="checkbox"/> Yes -> Continue to 2-3<br><input type="checkbox"/> No -> STOP, record outcome (a) No candidate VL CLABSI  |                |                              |
| 2-3. Was central line (CL) in place for >2 calendar days AND in place during a VL stay for any period of time?   |                       |  |   |                                      | <input type="checkbox"/> Yes -> Continue to 2-4<br><input type="checkbox"/> No -> STOP, record outcome (a) No candidate VL CLABSI  |                |                              |
| 2-4. Did the positive blood specimens include <b>only</b> the following organisms?<br>a. <i>Campylobacter</i> spp., <i>C. difficile</i> , Enteropathogenic <i>E. coli</i> , Enterohemorrhagic <i>E. coli</i> , <i>Vibrio</i> spp, <i>Salmonella</i> spp., <i>Shigella</i> spp., <i>Listeria</i> spp., <i>Yersinia</i> spp. (These organisms are excluded pathogens for LCBI. They may be secondary BSIs but will not be reported as the sole pathogen in a primary BSI.)<br>b. <i>Blastomyces</i> , <i>Histoplasma</i> , <i>Coccidioides</i> , <i>Paracoccidioides</i> , <i>Cryptococcus</i> , <i>Pneumocystis</i> (These organisms are typically causes of community-associated infections and are rarely known to cause healthcare-associated infections, and therefore are excluded.) |                       |  |   |                                      | <input type="checkbox"/> No -> Continue<br><input type="checkbox"/> Yes -> STOP, record outcome (a) No candidate VL CLABSI   |                |                              |
| Table 1a. List Positive Blood Specimens chronologically:   |                       |  |   |                                      |  |                |                              |
| Positive BC*   | Date BC Collection    | Validation Location BC?                  | Optional: CL* on this date or day before? | Organism genus/species               | P or CC*   | Infection DOE* | RIT* End Date and RIT number |

**3. LABORATORY CONFIRMED BLOOD STREAM INFECTION (LCBI) CRITERIA**  
*Evaluate all positive blood specimens in order as potential Laboratory Confirmed Bloodstream Infection (LCBI), using table columns in the MRAT Instructions; determine if there was an LCBI, and which type (LCBI 1, LCBI 2, or LCBI 3) was met, if any.*

**4. Did Infection Episode Qualify as LCBI Event? (begin loop)**

|                              |   |            |        |            |        |            |   |
|------------------------------|---|------------|--------|------------|--------|------------|---|
| <input type="checkbox"/> No  | <i>If LCBI definition was NOT met, record outcome (b) No LCBI, and reason (i.e., unmatched common commensal, asymptomatic matched common commensals, or alternative primary site infection with secondary BSI), and continue to next Infection Event. If no more positive blood specimens, STOP</i> |            |        |            |        |            |   |
| <input type="checkbox"/> Yes | <i>If Yes LCBI, document type of LCBI and Date of Event below. Note: there may be more than one LCBI during an episode of care.</i>   |            |        |            |        |            |   |
|                              | Type of LCBI (circle one):  |            |        |            |        |            | Date of LCBI Event (date FIRST of required elements was met during the LCBI IWP): |
| First LCBI                   | LCBI 1  | MBI LCBI 1 | LCBI 2 | MBI LCBI 2 | LCBI 3 | MBI LCBI 3 |   |
| Second LCBI                  | LCBI 1  | MBI LCBI 1 | LCBI 2 | MBI LCBI 2 | LCBI 3 | MBI LCBI 3 |   |
| Third LCBI                   | LCBI 1  | MBI LCBI 1 | LCBI 2 | MBI LCBI 2 | LCBI 3 | MBI LCBI 3 |   |
| Add rows if needed           |   |            |        |            |        |            |   |

| <b>5. Was LCBI Healthcare-Associated (HAI) or Present on Admission (POA)?</b>   |  |
|---|--|
| <i>Did LCBI occur during the time period of 2 days before facility admission to the day after facility admission (POA)?</i>   |  |
| <input type="checkbox"/> Yes  | <i>If Yes, LCBI was POA; document outcome (c) POA LCBI type and evaluate next positive blood specimen outside of the event LCBI RIT.<br/>If no more blood specimens, STOP</i>                    |
| <input type="checkbox"/> No   | <i>If No, proceed to 6.</i>  |
| <b>6. HAI-LCBI vs CLABSI?</b>   |  |
| <b>6a Was this HAI-LCBI a CLABSI</b>  |  |
| <input type="checkbox"/> Yes  | <i>If Yes, HAI-LCBI is CLABSI; proceed to 6b.</i>  |
| <input type="checkbox"/> No   | <i>If No, document outcome (d) HAI-LCBI not CLABSI and evaluate next positive blood specimen with date of event outside the LCBI RIT.<br/>If no more blood specimens, STOP</i>                   |
| <b>6b Was there medical documentation of the patient suspected or observed self-injecting into their vascular access device within the infection window period?</b>   |  |
| <input type="checkbox"/> Yes  | <i>If Yes, document outcome (d) HAI-LCBI not CLABSI and evaluate next positive blood specimen with date of event outside the LCBI RIT.<br/>If no more blood specimens, STOP</i>                  |
| <input type="checkbox"/> No   | <i>If No, HAI-LCBI is CLABSI; proceed to 6c.</i>   |
| <b>6c Was there pus documented at one of the following sites of insertion, and did that pus have at least one organism that matched one of the organism(s) in the blood specimen during the LCBI Infection Window Period?</b> |  |
| <input type="checkbox"/> Yes  | <i>If Yes, then disassociate the LCBI from the central line – document outcome (d) HAI-LCBI not CLABSI and evaluate next positive blood specimen with date of event outside of the LCBI RIT.</i> |
| <input type="checkbox"/> No   | <i>If No, HAI-LCBI is CLABSI; proceed to 7.</i>  |

| <b>7. WAS VALIDATION LOCATION (VL) the Location of Attribution (LOA)?</b>   |   |
|---|---|
| <b>7a. Was patient in a VL on date of LCBI Event or day before Event?</b>   |   |
| <input type="checkbox"/> Yes  | <i>If Yes, proceed to b.</i>  |
| <input type="checkbox"/> No   | <i>If No, document outcome (e) CLABSI not VL attributable and evaluate next positive blood specimen with date of event outside the previous LCBI RIT.<br/>If no more blood specimens, STOP</i>  |
| <b>7b. Was patient transferred to VL from another bedded inpatient location, on date of LCBI Event or day before Event?</b> |   |
| <input type="checkbox"/> Yes  | <i>If Yes, location of attribution was the <u>transferring location</u>. Proceed to c.</i>  |
| <input type="checkbox"/> No   | <i>If No, location of attribution was location at time of infection; STOP record outcome (f) VL CLABSI</i>  |
| <b>7c. Was the transferring location a validation location (VL)?</b>  |   |
| <input type="checkbox"/> Yes  | <i>If Yes, location of attribution (transferring location) WAS a validation location; STOP record outcome (f) VL CLABSI</i>   |
| <input type="checkbox"/> No   | <i>If No, location of attribution (transferring location) was NOT a validation location; record outcome (e) CLABSI not VL attributable and evaluate next positive blood specimen with date of event outside the previous LCBI RIT.<br/>If no more blood specimens, STOP</i> |

| 8 Outcome Documentation        |               |   |   |
|--------------------------------|---------------|---|---|
| Positive Blood specimen Number | Outcome (a-f) | Detail for outcomes (b) through (f) (See key below) | Provide detail for Case Determination and reason (See key to below) |
| 1                              |               |   |   |
| 2                              |               |   |   |
| 3                              |               |   |   |
| 4                              |               |   |   |
| 5                              |               |   |   |

(a) No candidate validation location (VL) CLABSI  
 (b) No LCBI  
 Reason (Select one):

- Contaminant (unmatched CC)
- Matching CCs with no symptoms
- Alternative primary source of BSI (complete box):

-Primary source of BSI \_\_\_\_\_  
 -Date of alternative primary event \_\_\_\_\_  
 -Attach NHSN checklist with elements abstracted  
 -Circle correct NHSN BSI Chapter, Appendix B criterion:

1. At least one organism from the blood specimen matches an organism identified from the site-specific infection that is used as an element to meet the NHSN site-specific infection criterion AND the blood specimen is collected during the secondary BSI attribution period (infection window period + repeat infection time frame).
2. An organism identified in the blood specimen is an element that is used to meet the NHSN site-specific infection criterion, and therefore is collected during the site-specific infection window period.

(c) POA LCBI  
 Type of LCBI, Select one: LCBI1 MBI-LCBI1 LCBI2 MBI-LCBI2 LCBI3 MBI-LCBI3  
 (d) HAI-LCBI not CLABSI  
 Type of LCBI, Select one: LCBI1 MBI-LCBI1 LCBI2 MBI-LCBI2 LCBI3 MBI-LCBI3  
 (e) CLABSI not VL attributable  
 Type of LCBI, Select one: LCBI1 MBI-LCBI1 LCBI2 MBI-LCBI2 LCBI3 MBI-LCBI3  
 (f) VL CLABSI;  
 Type of LCBI, Select one: LCBI1 MBI-LCBI1 LCBI2 MBI-LCBI2 LCBI3 MBI-LCBI3  
 Date of VL CLABSI \_\_\_\_\_  
 Location of attribution \_\_\_\_\_

**Note: Each infection episode should have an assigned outcome a-f. There may be multiple LCBIs, or multiple CLABSIs during a single episode of care.**

| Case Determination<br>(A) Correctly Classified   | (B) Over-reported HAI   | (C) Underreported HAI |
|--|---|-----------------------|
| <b>If CLABSI was misclassified (over- or underreported) by facility, what was the reason?</b>  |   |                       |
