

NIOSH Annual Science Awards 2014

May 1, 2014

1 p.m. EDT | 10 a.m. PDT

James P. Keogh Award

James P. Keogh, M.D., worked throughout his life for peace and social change, he sought to safeguard workers through education about hazards, and he advocated workplace protections. This award recognizes one current or former NIOSH employee for exceptional service to the field of occupational safety and health.

Alice Hamilton Award

The spirit of Alice Hamilton, M.D., lives on at NIOSH, where we continue to explore the “dangerous trades.” This award honors her work as physician, scientist, humanitarian, social reform leader, and pioneer in occupational safety and health. The Alice Hamilton Award honors NIOSH employees for the scientific excellence of their technical and instructional materials.

Bullard-Sherwood Research-to-Practice Award

Edward Bullard and Jerry Sherwood have made significant contributions to workplace injury and illness prevention. This award recognizes NIOSH scientists who make outstanding efforts that demonstrate noteworthy impact and relevance through partnerships.

Intramural
Award for
Extraordinary
Science

Director's Intramural Award for Extraordinary Science

As a tribute to their dedication to science excellence, this award honors employees for a collective body of work that has made significant contributions to the NIOSH mission. Award categories recognize experienced scientists, early career scientists, and scientific support staff.
