Subject: 008-A - Powered Air-Purifying Respirator (PAPR) Docket

Hello:

It was announced at the recent Public Meeting that NPPTL was not intending to publish a final concept document for review. Draeger Safety requests that this be reconsidered and that another (final) release of the concept be issued for a thorough review. In addition, the Docket period for receipt of comments on the PAPR Docket 008-A should be extended until this concept has been released.

Regards

Bob Sell
