The Pesticide Education Center is a nonprofit organization and
will help work with their families,
who have been exposed to pesticides,
and their communities in occupational and environmental medicine.
The founder of the PEC, Dr. Marion Moser, is a physician,
who has dedicated his life to helping the public make more informed decisions and choices.

Our goal is to provide critical information about pest-
control methods, the home and garden, and the environment and

Concerned about risks to their health from exposure to pesticides?

PEC works with

Founded in 1985, the Pesticide Education Center (PEC) aims to educate the public about the hazards and health

PEC's mission is to inform and empower individuals and communities to take control of their own health and safety.

PEC offers workshops, educational materials, and a wealth of resources to help people make informed decisions about pest control and environmental health.

PEC is supported by a diverse network of partners, including health organizations, community groups, and individuals committed to environmental justice.

PEC's work is guided by a Board of Directors comprising representatives from a wide range of organizations and backgrounds.

PEC is committed to advancing environmental justice and providing resources to help people make informed decisions about pest control and environmental health.

PEC is a 501(c)(3) nonprofit organization.

Programmes, Partnerships and Projects

I began my work with the PEC in order to meet your specific needs. We do community initiatives, education, and work with the local community. We provide support to volunteers who want to contribute.

WE CAN HELP

If you need assistance with school or community, please contact your nearest PEC office or our local coordinator. We provide assistance with school and community volunteering and we welcome your help.

How YOU CAN HELP

If you need help with school or community, please contact your nearest PEC office or our local coordinator. We provide assistance with school and community volunteering and we welcome your help.

INFORMATION ACCESS

The Problem of Pesticides

Our project focuses on the impact of pesticides on the environment and human health. We offer workshops and seminars on the effects of pesticides on the environment.

The Pesticide Program works with schools and communities to raise awareness about the dangers of pesticides.

Access to chemical information is controlled and restricted to prevent misuse.

We promote sustainable agriculture and encourage the use of organic farming methods to reduce the impact of pesticides on the environment and human health.

Our project is funded by donations from individuals and organizations who support our mission.

Your Support is Vital
