**Subject:** 103 - Endicott Project Comments

I started at IBM Endicott in . . . and worked until . . . My question is how do they know my medical problems now? In . . . had double heart bypass surgery and 5 months later I was diagnosed with prostate cancer. Was it related to some of the chemicals I came in contact with while working?  
Who do you report this to to make them aware?  
Thank-you
