Virginia Beach Fire Department

Allied Technology Fire Mayday Event

March 10, 2008
"MAYDAY!"
Background

- March 10, 2008 – 11:31 am
- Ultimately upgraded to three alarms
  - 46 Fire Apparatus
  - 116 Personnel
- Commercial structure - approximately 139,000 sq ft
- Corrugated aluminum on concrete slab
- E32 – Three-person crew
- Assigned to relieve E33's crew
- Hose line already extended into the building
- Very dense smoke

Approximately on hour into the incident, at 12:25:24, a Mayday was called.
The Mayday

- E32’s crew followed pre-existing line into warehouse
- Captain left his crew and became disoriented
- Noticed he was getting very low on air
- (Conflicting reports)
- Eventually advised interior BC
The Mayday

- Searched unsuccessfully for crew
- Crew witnessed Captain's disorientation
- FF #2 followed Captain deeper into structure
- Low air alarm sounded
- Captain attempted Mayday (inaudible)
The Mayday

- Captain “stumbling” back and forth between pallets
- FF #1 and FF #2 “grab” Captain
- FF #2 successfully calls Mayday
- Captain’s air supply runs out – Broke seal to mask in an attempt to breath
- FF #1 attached “buddy-breathing” system
- Interior BC led crew out of the building
Outcomes

- Both FF #1 and FF #2 agreed the training they received on “MAYDAY – FF Down” and “Buddy-Breathing” positively affected the outcome of the this situation
- All FFs were released at the scene (no injuries)
- Retrospection on “what if?”
Thank you
