Comments

I would NIOSH to consider the testing SCBA units and bottles as seperate components to allow municipalities to competitive bid the bottles as seperate components. By allowing a DOT approved cyclinder to be used in any SCBA pack it will create a more competitive business environment which will result in a large cost saving to every city, town and taxpayer a lot of money.

In todays economic climate we all need to be able to save money. The current wording used by NIOSH is costing taxpayers to choice between staffing and equipment.

You have the power to save every taxpayer in the country a good amount taxpayer dollars.

Thank you for your time.
