Subject: Addition to the List of WTC-Related Health Conditions

**CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Dear Sir/Ma'am

Attached/below is my petition to add Coronary Artery Disease (CAD) to the list of WTC-Related Health Conditions.

Per <https://www.cdc.gov/wtc/petitions.html> :

1) Name and contact information of the interested party. I am a WTC responder, currently covered by Sedgwick.

[REDACTED]

2) Name and description of the conditions(s) to be added

Coronary Artery Disease (CAD)

3) Reasons for adding the conditions(s), including the medical basis for the association between the September 11, 2001, terrorist attacks and the condition(s) to be added.

CAD was previously considered as Petition 4 on May 6, 2014 (<https://www.govinfo.gov/content/pkg/FR-2014-05-06/pdf/2014-10434.pdf>). However, there is now sufficient evidence to publish a proposed rule to add this health condition in the Federal Register. The following study published in the National Library of Medicine (<https://pmc.ncbi.nlm.nih.gov/articles/PMC8215565>) states this.

Therefore, CAD needs to be added to the list of WTC-Related Health Conditions. Please let me know if you have any questions.
