To: NIOSH Docket Office (CDC)
Subject: Docket #221

Gentlemen:

I want to urge you to change your approval process to separate approval for SCBA cylinders OR remove the cylinder from the approval process altogether. Your current policy only serves to cost the fire service millions in extra costs. Your current policy only creates a monopoly for SCBA manufacturers. What is happening with NIOSH would be illegal in any other industry. Please change 42 CFR part 84 and the approval process to permit component cylinder approval.
