Footnotes:

* Major 01: Most of the other infectious diseases can be found in the residual category.

† Minor 003: Only one year of ICD-9 data is available for 1975-1979 so the rates are an underestimate. However, observed should conform to expected, absent any exposure effect.

‡ The two minors for cancer of the pleura (Minor 017) and peritoneum (Minor 014) are not comparable between the ninth and tenth revisions because mesotheliomas occurring at those sites were coded into the new tenth revision mesothelioma category beginning in 1999.

§ Beginning with ICD-10 (129 deaths in 1999), malignant neoplasm of peripheral nerves moved from Minor 032 to Minor 033.

** Minor 036 includes, penis, endocrine, ill-defined, secondary, multiple primary and unspecified sites.

†† Only two years of ICD-8 data for 1965-1969 are available, therefore, the rates for Minor 057 are an underestimate. However, observed should conform to expected, absent any exposure effects.

‡‡ The asterisk (*) precedes the code to indicate that this is not a recognized WHO code (see NCHS, Classification of Death and Injury Resulting from Terrorism, http://www.cdc.gov/nchs/about/otheract/icd9/terrorism_code.htm, Accessed Jan 12, 2006.
