NPPTL COVID-19 Response: International Respirator Assessment

Manufacturer: Foshan Nanhai Weijian Sanbang Protective Products Technology Co., Ltd.
Model Tested: 9051A KN95
Date Tested: June 18, 2020

These findings pertain to the Foshan Nanhai Weijian Sanbang Protective Products Technology Co., Ltd., model 9051A KN95. The packaging and labeling for this product indicate that it meets GB2626-2006 (the Chinese standard for Respiratory Protective Equipment – Non-Powered Air-Purifying Particle Respirator).

Thirty respirators were submitted for evaluation. The respirators were sampled into groups of ten for evaluation. The samples were tested using a modified version of NIOSH Standard Test Procedure (STP) TEB-APR-STP-0059. This modified assessment plan can be found here.

No certificate of approval was provided with the samples received; therefore, the authenticity of the claims cannot be validated.

The maximum and minimum filter efficiency was 98.55% and 94.21%, respectively. Twenty-two respirators measured more than 95%. Eight respirators measured less than 95%.

While the above-listed product classification has similar performance requirements to NIOSH-approved devices, NIOSH does not have knowledge about the sustained manufacturer quality system and product quality control for these products. NIOSH also does not have knowledge about the product’s handling and exposures after leaving its manufacturer’s control.

In addition, this product is an ear loop design. Currently, there are no NIOSH-approved products with ear loops; NIOSH-approved N95s have head bands. Furthermore, limited assessment of ear loop designs, indicate difficulty achieving a proper fit. While filter efficiency shows how well the filter media performs, users must ensure a proper fit is achieved.

This assessment is not a part of the NIOSH respirator approval process and will in no way lead to or preclude NIOSH approval through the official approval process. This assessment was developed as an assessment of the filter efficiency for those respirator’s represented as certified by an international certification authority, other than NIOSH, to support the availability of respiratory protection to US healthcare workers due to the respirator shortage associated with COVID-19. Only particulate filter efficiency was assessed.

The results provided in this letter are specific to the subset of samples that were provided to NPPTL for evaluation.

These results will be used to update the CDC guidance for Crisis Capacity Strategies (during known shortages).

Minimum Filter Efficiency: 94.75  
Maximum Filter Efficiency: 96.20

- The test method utilized in this assessment is not the NIOSH standard test procedure that is used for certification of respirators. Respirators assessed to this modified test plan do not meet the requirements of STP-0059, and therefore cannot be considered equivalent to N95 respirators that were tested to STP-0059.
- Respirators tested may not be representative of all respirators with the same certification mark. NIOSH has no control over suppliers and distributors of respirators certified by other national or international parties.
- This assessment is not a confirmation that it conforms with any or all of its specifications in accordance with its certification mark.
- This assessment was not a part of the NIOSH approval program. These results do not imply nor preclude a future approval through the NIOSH respirator approval program.

NPPTL COVID-19 Response: International Respirator Assessment
使用范围 Scope of use
该产品可过滤空气中的颗粒物、粉尘、烟、雾、稀释气溶胶、分泌物，适用于工业场合以及粉尘、烟、雾、颗粒物多的环境。
The product can filter the particles, dust, smoke, fog in the air, block the droplets and secretions, it is suitable for industrial sites and environments with more dust, smoke, fog and particles.

使用方法 Usage method
1. Wear the head band on the palm, Nose clip at finger end. Let the headband fall naturally. Hold the mask.
2. Hold the mask by hand to fit the face and fully cover the nose and mouth.
3. Pull the headband over the top of the head and over the top of the head and over the back of the ear.
4. Press the nose clip with both hands. Fill the mask and nose split fit and suitable for inspection.

注意事项 Attention
1. 使用前请检查包装有无破损，口罩是否损坏，如有损坏禁止使用。
2. 本品注意防潮。
3. 佩戴中如发生液体喷溅、破损、受潮及感觉呼吸阻力明显增大时，请及时更换。
4. 佩戴后感觉不适，请立刻丢弃。

1. Before use, please check whether the package is damaged and whether the mask is damaged. If there is any damage, it is forbidden to use.
2. Pay attention to moisture-proof.
3. In case of splashing, damage, damp and obvious increase of respiratory resistance during wearing, please change it in time.
4. Please discard immediately if feel unwell after wearing.
## NPPTL COVID-19 Response: International Respirator Assessment

### Disposable Mask Specifications

- **Product Name:** Disposable Mask  
- **Product Model:** 9051A KN95  
- **Product Specification:** 10.5cm x 15.5cm  
- **Product Brand:** SANBANG  
- **Main Materials:** non-woven 55% + melt blown 22.5% + hot air cotton 22.5%  
- **Executive Standard:** GB2626-2006  
- **Production Date:** see the certificate  
- **Production Batch No.:** see the certificate  
- **Inspection Date:** see the certificate  
- **Term Of Validity:** 3 years

### Manufacturer Information

- **Manufacturer:** Foshan Nanhai Weijian SanBang Protective Products Technology Co., Ltd  
- **Production Address:** No. 5 Workshop, No. 19, Yongqing North Street, Liansha Shadiun hv village, Development Zone, Danzao Town, Nanhai District, Foshan City  
- **Service Hotline:** 0757-85431977

---

**Warning Icon:**  
- Do not use when package is damaged  
- Do not reuse  
- Keep dry  
- Avoid direct sunlight

**Made In China**
