NPPTL COVID-19 Response: International Respirator Assessment

Manufacturer: Improve Medical (Hunan) Co., Ltd.
Model Tested: PPDS Ear Hook
Date Tested: June 19, 2020

These findings pertain to the Improve Medical (Hunan) Co., Ltd., model PPDS Ear Hook. The packaging for this product indicates that it meets GB2626-2006 (the Chinese standard for Respiratory Protective Equipment – Non-Powered Air-Purifying Particle Respirator).

Thirty respirators were submitted for evaluation. The respirators were sampled into groups of ten for evaluation. The samples were tested using a modified version of NIOSH Standard Test Procedure (STP) TEB-APR-STP-0059. This modified assessment plan can be found here.

No certificate of approval was provided with the samples received; therefore, the authenticity of the claims cannot be validated.

The maximum and minimum filter efficiency was 97.16% and 94.63%, respectively. Twenty-seven respirators measured more than 95%. Three respirators measured less than 95%.

While the above-listed product classification has similar performance requirements to NIOSH-approved devices, NIOSH does not have knowledge about the sustained manufacturer quality system and product quality control for these products. NIOSH also does not have knowledge about the product’s handling and exposures after leaving its manufacturer’s control.

In addition, this product is an ear loop design. Currently, there are no NIOSH-approved products with ear loops; NIOSH-approved N95s have head bands. Furthermore, limited assessment of ear loop designs, indicate difficulty achieving a proper fit. While filter efficiency shows how well the filter media performs, users must ensure a proper fit is achieved.

This assessment is not a part of the NIOSH respirator approval process and will in no way lead to or preclude NIOSH approval through the official approval process. This assessment was developed as an assessment of the filter efficiency for those respirator’s represented as certified by an international certification authority, other than NIOSH, to support the availability of respiratory protection to US healthcare workers due to the respirator shortage associated with COVID-19. Only particulate filter efficiency was assessed.

The results provided in this letter are specific to the subset of samples that were provided to NPPTL for evaluation.

These results will be used to update the CDC guidance for Crisis Capacity Strategies (during known shortages).

- The test method utilized in this assessment is not the NIOSH standard test procedure that is used for certification of respirators. Respirators assessed to this modified test plan do not meet the requirements of STP-0059, and therefore cannot be considered equivalent to N95 respirators that were tested to STP-0059.
- Respirators tested may not be representative of all respirators with the same certification mark. NIOSH has no control over suppliers and distributors of respirators certified by other national or international parties.
- This assessment is not a confirmation that it conforms with any or all of its specifications in accordance with its certification mark.
- This assessment was not a part of the NIOSH approval program. These results do not imply nor preclude a future approval through the NIOSH respirator approval program.

E-mail: info@improve-medical.com

EC REP
Shanghai International Holding Corp. GmbH (Europe)
Eifelstrasse 80, 20537 Hamburg, Germany
Model: PPDS™ Ear Hook

Size: L

LOT: 20042700

MFG: 20200427

EXP: 20230426

*Meets China GB2626-2006 KN95 standard.
*Reviewed and authorized by US FDA EUA policy.
Intended Use
PPDS™ Disposable Protective Respirator is intended to protect both the patient and healthcare personnel from transfer of microorganisms, body fluids, and particulate material. These face masks are intended for use in infection control practices to reduce the potential exposure to blood and body fluids. It is for single use, provided non-sterile.

The Component
Mask (Spunbond polypropylene/ melt-blown polypropylene (PP) Electrostatic filter), strap headbands or ear bands, nose piece and adjustment buckles.

Product Specifications
Model: PPDS™ Strap Headband, PPDS™ Ear Hook
Size: M/L

Operation procedure (For PPDS™ Strap Headband)
1. Cup respirator in one hand with nose piece at fingertips, allow headbands to hang freely below hand.
2. Hold respirator under chin, with nose piece up.
3. Locate the upper strap across the crown of the head and the lower strap below the ears.
4. Straps must not be twisted.
5. Using both hands, mould nose piece to the shape of the nose to ensure a close fit and good seal. Finishing the nose piece using only one hand may result in less effective respirator performance.
6. The seal of the respirator on the face should be fit-checked before entering the workplace.

Operation procedure (For PPDS™ Ear Hook)
1. Stretch the respirator, make sure the position of the nose piece is on top.
2. Cover the mask on the nose and mouth, and pull the ear hook around both ears.
3. Fix metal nosepiece to mould the nose area, check air tightness, cover the mouth and nose with both hands, and exhale to prevent air leakage. Readjust nosepiece if air leaks around the nose.

Warning and Use Limitations
• Please check the packaging before use, if it is damaged, the product must not be used.
• Before initial use, always check that the product is within the stated shelf life. When storing or transporting this product, please use original provided packaging.
• This product is for single use, not reusable.
• During the wearing process, if the liquid splashes and the mask is damaged, please stop using it immediately and replace it in time.
