NPPTL COVID-19 Response: International Respirator Assessment

Manufacturer: Jiangxi Yifengyuan Biological Engineering CO., Ltd
Model Tested: KN95 FFP2 Disposable Protective Mask
Date Tested: July 29, 2020

Ten respirators were submitted for evaluation. The samples were tested using a modified version of NIOSH Standard Test Procedure (STP) TEB-APR-STP-0059. This modified assessment plan can be found here.

No certificate of approval was provided with the samples received; therefore, the authenticity of the claims cannot be validated.

The maximum and minimum filter efficiency was 98.05% and 91.30%, respectively. Five of the ten respirators measured less than 95%.

While the above-listed product classification has similar performance requirements to NIOSH-approved devices, NIOSH does not have knowledge about the sustained manufacturer quality system and product quality control for these products. NIOSH also does not have knowledge about the product’s handling and exposures after leaving its manufacturer’s control.

In addition, this product is an ear loop design. Currently, there are no NIOSH-approved products with ear loops; NIOSH-approved N95s have head bands. Furthermore, limited assessment of ear loop designs, indicate difficulty achieving a proper fit. While filter efficiency shows how well the filter media performs, users must ensure a proper fit is achieved.

This assessment is not a part of the NIOSH respirator approval process and will in no way lead to or preclude NIOSH approval through the official approval process. This assessment was developed as an assessment of the filter efficiency for those respirators represented as certified by an international certification authority, other than NIOSH, to support the availability of respiratory protection to US healthcare workers due to the respirator shortage associated with COVID-19. Only particulate filter efficiency was assessed.

The results provided in this letter are specific to the subset of samples that were provided to NPPTL for evaluation.

These results will be used to update the CDC guidance for Crisis Capacity Strategies (during known shortages).
NPPTL COVID-19 Response: International Respirator Assessment

Evaluation of International Respirators

**Test:** Modified TEB-APR-STP-0059

**Date Tested:** July 29, 2020

**Report Prepared:** July 31, 2020

**Manufacturer:** Jiangxi Yifengyuan Biological Engineering CO., Ltd

**Item Tested:** KN95 FFP2 Disposable Protective Mask

**Country of Certification:** European (EN149:2001+A1:2009)

**Minimum Filter Efficiency:** 91.30   **Maximum Filter Efficiency:** 98.05

- The test method utilized in this assessment is not the NIOSH standard test procedure that is used for certification of respirators. Respirators assessed to this modified test plan do not meet the requirements of STP-0059, and therefore cannot be considered equivalent to N95 respirators that were tested to STP-0059.
- Respirators tested may not be representative of all respirators with the same certification mark. NIOSH has no control over suppliers and distributors of respirators certified by other national or international parties.
- This assessment is not a confirmation that it conforms with any or all of its specifications in accordance with its certification mark.
- This assessment was not a part of the NIOSH approval program. These results do not imply nor preclude a future approval through the NIOSH respirator approval program.
KN95
FFP2
Disposable Protective Mask
Blocking saliva
Breathe freely
Skin-friendly

40 pcs/box
Made in China
**Structure And Composition**
This product is an ear-hanging mask composed of non-woven fabric, Melt blown fabric, filtrate fabric, nose clip and mask belt.

**Model specification**
Size: 12cm*16cm, 10pcs/bag

**Executive Standard**

**Storage Method**
Store in a dry, ventilated, non hazardous atmosphere.

**WEARING METHOD**
First put the nose clip up, hands pull one mask belt separately.
Then put on the mask, chin as far as the mask is inside, fasten the mask belt behind the ear with both hands to make the mask fit to the face.
Last adjust the nose clip by pressing the forefinger and middle finger of both hands and tighten the bridge of the nose.
NOTE
This product cannot be washed. Caution should be exercised in those allergic to nonwovens and those with abnormal cardiopulmonary function.
