NPPTL COVID-19 Response: International Respirator Assessment

Manufacturer: Jiande Chaomei Daily Chemical Co., Ltd.
Model Tested: 6002A-1
Date Tested: August 14, 2020

These findings pertain to the Jiande Chaomei Daily Chemical Co., Ltd., Model 6002A-1. The packaging and labeling for this product indicates that it meets GB2626-2006 (the Chinese standard for Respiratory Protective Equipment – Non-Powered Air-Purifying Particle Respirator).

Ten respirators were submitted for evaluation. The samples were tested using a modified version of NIOSH Standard Test Procedure (STP) TEB-APR-STP-0059. This modified assessment plan can be found here.

No certificate of approval was provided with the samples received; therefore, the authenticity of the claims cannot be validated.

The maximum and minimum filter efficiency was 99.36% and 98.16%, respectively. All ten respirators measured more than 95%.

While the above-listed product classification has similar performance requirements to NIOSH-approved devices, NIOSH does not have knowledge about the sustained manufacturer quality system and product quality control for these products. NIOSH also does not have knowledge about the product’s handling and exposures after leaving its manufacturer’s control.

This product has head bands/straps. While filter efficiency shows how well the filter media performs, users must ensure a proper fit is achieved.

This assessment is not a part of the NIOSH respirator approval process and will in no way lead to or preclude NIOSH approval through the official approval process. This assessment was developed as an assessment of the filter efficiency for those respirators represented as certified by a international certification authority, other than NIOSH, to support the availability of respiratory protection to US healthcare workers due to the respirator shortage associated with COVID-19. Only particulate filter efficiency was assessed.

The results provided in this letter are specific to the subset of samples that were provided to NPPTL for evaluation.

These results will be used to update the CDC guidance for Crisis Capacity Strategies (during known shortages).

- The test method utilized in this assessment is not the NIOSH standard test procedure that is used for certification of respirators. Respirators assessed to this modified test plan do not meet the requirements of STP-0059, and therefore cannot be considered equivalent to N95 respirators that were tested to STP-0059.
- Respirators tested may not be representative of all respirators with the same certification mark. NIOSH has no control over suppliers and distributors of respirators certified by other national or international parties.
- This assessment is not a confirmation that it conforms with any or all of its specifications in accordance with its certification mark.
- This assessment was not a part of the NIOSH approval program. These results do not imply nor preclude a future approval through the NIOSH respirator approval program.

1. 风格隔音设计，可调节鼻夹，加厚海绵垫，确保密合和鼻梁更舒适。
2. 膜层为PP无纺布，无毒、无味、无过敏、无刺激，透气性能佳，适合高湿环境使用。
3. 选用透气性较好的松紧织带，适合各种脸型使用。

检查方法:

使用前检查口罩包装是否破损，元件是否正常；如有污染、破损，请停止使用。在进入工作区域之前，必须检查口罩与脸部的密合性；如果感觉泄漏，请重新佩戴，如没有感觉到泄漏，方可进入工作区工作。当感觉呼吸阻力明显增加时或者口罩达到不到使用标准时，建议更换产品。

佩戴方法:

1. 将口罩拉伸展开；
2. 将上方头带拉过头顶，置于头顶上方；
3. 将下方头带拉过头顶，置于颈部耳朵下方；
4. 使用双手调整鼻夹的形状，直至将鼻夹完全按压或鼻梁形状为止，确保密合性；
5. 用手捏住口罩鼻夹，若感觉有气体会从鼻子处溢出，收紧鼻夹；若空气从边缘漏出，请重新调整头带，确保密合性。
