NPPTL COVID-19 Response: International Respirator Assessment

Manufacturer: Guangdong Jin Jun Lian Medical Technology Co., Ltd.
Model Tested: KN95
Date Tested: February 10, 2021

Ten respirators were submitted for evaluation. The samples were tested using a modified version of NIOSH Standard Test Procedure (STP) TEB-APR-STP-0059. This modified assessment plan can be found here.

No certificate of approval was provided with the samples received; therefore, the authenticity of the claims cannot be validated.

The maximum and minimum filter efficiency was 75.40% and 62.10%, respectively. All ten respirators measured less than 95%.

While the above-listed product classification has similar performance requirements to NIOSH-approved devices, NIOSH does not have knowledge about the sustained manufacturer quality system and product quality control for these products. NIOSH also does not have knowledge about the product’s handling and exposures after leaving its manufacturer’s control.

In addition, this product is an ear loop design. Currently, there are no NIOSH-approved products with ear loops; NIOSH-approved N95s have head bands. Furthermore, limited assessment of ear loop designs, indicate difficulty achieving a proper fit. While filter efficiency shows how well the filter media performs, users must ensure a proper fit is achieved.

This assessment is not a part of the NIOSH respirator approval process and will in no way lead to or preclude NIOSH approval through the official approval process. This assessment was developed as an assessment of the filter efficiency for those respirators represented as certified by an international certification authority, other than NIOSH, to support the availability of respiratory protection to US healthcare workers due to the respirator shortage associated with COVID-19. Only particulate filter efficiency was assessed.

The results provided in this letter are specific to the subset of samples that were provided to NPPTL for evaluation.

These results will be used to update the CDC guidance for Crisis Capacity Strategies (during known shortages).

**Minimum Filter Efficiency:** 62.10%  **Maximum Filter Efficiency:** 75.40%

- The test method utilized in this assessment is not the NIOSH standard test procedure that is used for certification of respirators. Respirators assessed to this modified test plan do not meet the requirements of STP-0059, and therefore cannot be considered equivalent to N95 respirators that were tested to STP-0059.
- Respirators tested may not be representative of all respirators with the same certification mark. NIOSH has no control over suppliers and distributors of respirators certified by other national or international parties.
- This assessment is not a confirmation that it conforms with any or all of its specifications in accordance with its certification mark.
- This assessment was not a part of the NIOSH approval program. These results do not imply nor preclude a future approval through the NIOSH respirator approval program.
PROTECTIVE RESPIRATOR
This product is a non-medical device.

FFP2
KN95

10 PCS/BOX

PFE

95%

THREE-DIMENSIONAL PROTECTIVE RESPIRATOR

MODEL SPECIFICATION: 160*130*105mm
shelf life: 3 years (unopened)

STRUCTURAL COMPOSITION

HOW TO WEAR
1. Hold the respirator in hand, the fingertip is located in the nose clip, let the earband fall naturally.
2. Put the respirator over the face and make sure that the nose strip of the respirator is close to the nose to ensure tightness.
3. Pull the earband behind the ear.
4. Use two hands to adjust the whereabouts of the nose strips to ensure tightness.

MANUFACTURER
Guangdong Jin Jun Lian Medical Technology Co., Ltd.

ADDRESS
Room 202, Building 2, No.7 Jingsheng Road, Niushan, Dongcheng Street, Dongguan City, 523000, Guangdong, China.

KN95

HOW TO WEAR

1. Hold the respirator in hand, the fingertip is located in the nose clip, let the earband fall naturally.

2. Put the respirator over the face and make sure that the nose strap of the respirator is close to the nose to ensure tightness.

3. Pull the earband behind the ear.

4. Use two hands to adjust the whereabouts of the nose strips to ensure tightness.
