ENERGY MEASUREMENTS, INC.
CAP BUDGET PROPOSAL - OCTOBER 1985
GENERAL SERVICES AIDE

JOB DESCRIPTION

Responsible for driving an automatic transmission van transporting up to fourteen passengers between Las Vegas and the Nevada Test Site (NTS). Conducts pre-trip vehicle inspections checking gas, oil, water and tires to insure proper levels and pressures. Regulates the vehicles heating, lighting and ventilating systems for passenger comfort. Reports any performance problems regarding the vehicle to his/her supervisor. This work is done on a call-out basis.

QUALIFICATIONS

Requires a minimum of five years driving experience, some of which has been driving a large capacity van. Must have a good driving record and must have no physical problems which would prevent night driving. Also, requires common knowledge regarding vehicle operating conditions (fluid levels, tire pressures, wear, etc.) to inspect vehicle before use.

HR PER-C/B
16 September 1985
GENERAL SERVICES ASSISTANT

JOB DESCRIPTION:

May supervise functions such as: mail messenger service, printing and duplication, records management, a central filing system, or, custodial services. May provide indirect supervision to others within the scope of a specific service. Determines work procedures and may issue written or oral instruction. Assigns duties commensurate with function and assures that work is exact, neat and completed to meet deadlines. Coordinates work within the Department and with other organizations. Reviews methods of operation to increase productivity and effect cost reductions. Communicates, in writing as well as verbally, to higher level of management regarding the assigned function. Recommends changes or revisions to related systems, methods, procedures and practices. Prepares relevant reports and performs related work as required.

Minimum Qualifications

Working experience or training that would demonstrate ability to perform assigned duties and responsibilities.

Director of Industrial Relations
CLASSIFICATION: General Services Manager

JOB DESCRIPTION:

Responsible for the physical condition of buildings, grounds and utilities and for the efficient operation of such service functions as: shipping and receiving, PBX switchboards and internal telephone system, Company library, information center, etc. Accountable for results in terms of cost, methods and personnel. Duties include planning construction or installation and alteration of buildings and equipment. Responsible for hiring, firing, disciplining and reviewing the work performance of subordinates.

QUALIFICATION REQUIREMENTS:

Bachelor's degree in Business Administration or the equivalent with an exposure to civil, electrical and mechanical engineering and a background of successful supervisory experience.
JOB DESCRIPTION

Perform a variety of glass working operations to fabricate glass envelopes for electronic tubes such as cut, weld and form standardized shapes from quartz and other glasses, using glass lathe, torch and breath or compressed air. Make routine metal-to-glass welds such as to join Kovar buttons and 7052 glass envelopes.

Work from drawings, specifications and verbal instructions. Select specified size and type of glass tubing, score with file and break to prescribed lengths. Clean and inspect glass and fire polish to remove superficial scratches and imperfections. Use glass lathe, torch, hand tools, breath and/or compressed air to weld different sizes of tubing. Smooth and polish welds and ends and check to assure specified dimensional accuracy. Follow specified heat-time cycles for annealing work. Set up and operate semi-automatic machine to form various sizes of spirals from glass tubing, adjusting machine speed, torches and compressed air to obtain required pitch and spacing of coils and to avoid tube distortion. Cut spirals to specified lengths and weld, smooth and polish stubs as directed.

QUALIFICATION REQUIREMENTS

A well rounded knowledge of glass blowing techniques and practices, the physical characteristics and working qualities of a variety of glass and standard procedures for heating and annealing. Equivalent to accredited apprentice training in glass blowing plus a minimum of four years' experience in laboratory glass blowing for the electron tube industry. Familiar with high vacuum systems, leak detecting, and R.F. sealing techniques.

ENERGY MEASUREMENTS GROUP
Office Manager IV

JOB DESCRIPTION

Responsible for the direction, coordination and consolidation of administrative support in a specific field or area of specialization. Plans, organizes, directs, controls and reviews the work of the office through subordinate supervisory personnel. Determines priorities and initiates resolution of complex administrative or organizational matters. Undertakes special assignments as delegated to define problems, collect, analyze, interpret and evaluate data and select alternatives. Establishes rationale for and projects consequences of decisions and recommendations. Consults as required with 1183 Energy Measurements Group and other EG&G personnel, DOE/NV, LLL, LASL, Sandia, DoD and other government agencies.

CLASS DIFFERENTIATION

This class is differentiated from the lower classification of Office Manager III by the greater number and complexity of functions, supervisory personnel and the degree of impact on EMG activities.

QUALIFICATION REQUIREMENTS

Thorough knowledge of company policies, programs, systems and methods. Position requires extensive managerial experience which demonstrated the ability to plan, organize, direct, coordinate and supervise the work of an appropriate staff through subordinate supervisors.

Operations Coordinator

JOB DESCRIPTION

Works under consultative direction towards predetermined goals and objectives. Determines and pursues courses of action to obtain desired results. Work is checked through consultation and implements programs, policies and procedures and coordinates activities for complex activities (field operations, emergency responses) of technical and administrative specialties. Develops and provides training and briefings in relation to these activities. Interacts with federal, state, civil and other external agencies as the EM organizations representative for major organization events.

QUALIFICATION REQUIREMENTS

Bachelor's degree in Business Administration or Science or equivalent education and experience. In addition, must have a minimum eight years related experience.
CLASSIFICATION: Operations Manager

JOB DESCRIPTION

Is responsible for planning, organizing, supervising and directing the activities of a number of departments located in a geographic area and engaged in technical support activities pertinent to one of the major programs of the ERDA Contract Group. Assists the Program Manager in the overall administration and management of the program, with particular reference to the activities at the specific location but recognizing pertinent interfaces at other locations and customer requirements and reactions for the program as a whole. Develops operating budgets for the conduct of the work for that program at the assigned location in coordination with programmatic and financial personnel. Recommends and implements staffing, procurement, and operating methods changes as required to match projected and actual costs to budgets. Supervises the development and dissemination of pertinent performance and managerial criteria for the use of department managers and other supervisors. Supervises the monitoring of performance in terms of cost, responsiveness and quality of performance. Supervises the maintenance of proper interface relationships between departments and other technical and administrative support organizations at the operating location as well as the interaction of subordinates under immediate direction with key customer representatives.

QUALIFICATION REQUIREMENTS

Thorough knowledge of Company policies and technical capabilities, customer needs and requirements and specific program operating methods and the ability to supervise and coordinate the activities of a number of technically oriented functional departments engaged in the support of a particular program at a particular geographical location. Position requires substantial technical and administrative expertise to effectively plan, organize, and supervise personnel directly engaged in specific areas of technology to efficiently interpret customer requirements.

Manager, Industrial Relations
Services Department
CLASSIFICATION: Programmer

JOB DESCRIPTION:

Analyze and interpret programming systems design and output specifications. Prepare all levels of general or detailed block diagrams and machine logic flow charts. Prepare instruction sheets to guide computer operators during production runs. Develop test data and routines. Determine machine time requirements for checkout, accomplish checkout of programs, locate and correct errors. Revise and refine programs as required and document all procedures used throughout the computer program. Evaluate and modify existing programs taking into account changes in systems requirements or equipment configurations. Consult with members of other departments in the solution of mutual problems. Provide assistance to lower level programmers. May perform other related duties of a comparable complexity as required.

QUALIFICATION REQUIREMENTS:

Bachelor's degree or equivalent plus normally three to four years' business programming experience, broad knowledge of programming techniques.

Source: Corporate IR

Approved: C. Haugle
Industrial Relations Manager
CLASSIFICATION: Programmer/Analyst I

APPLICABLE LOCATION(S): Las Vegas, Los Alamos, San Ramon, Santa Barbara, and Kirtland

JOB DESCRIPTION:

Under immediate supervision, provides computer programming for business, scientific, or engineering applications. Conducts programming and analyses at a basic professional level as assigned and instructed. Performs coding, debugging, and documentation of less complex programs and modules. Assignments generally are under the technical direction of a higher level programmer/analyst. Usually has some background or training in computer applications with a working knowledge of at least one high level language. This classification is staffed by beginners in programming/analysis who have had sufficient educational background and/or experience to qualify for an entry level position.

QUALIFICATION REQUIREMENTS:

Experience which has provided a good working knowledge of programmer/analyst activities or a Bachelor's degree in mathematics, computer science, or business.

C. E. Naugle, Director
Industrial Relations Division
CLASSIFICATION: Programmer/Analyst II

APPLICABLE LOCATION(S): Las Vegas, Los Alamos, San Ramon, Santa Barbara, and Kirtland

JOB DESCRIPTION:

Under direct supervision, provides computer programming for business, scientific, or engineering applications. Assists higher level personnel in devising computer programming and system specifications, algorithms, and database structures. Confers with higher level personnel to determine functional specifications, and designs, codes, tests, and implements relatively complex component level modules of larger programming systems. Performs coding, debugging, and documentation of relatively complex programs and modules. Usually is capable of working on several phases of moderately complex business, scientific, or engineering applications with only general direction, but requires some specific instruction and guidance when dealing with more complex applications. This level equates to a journeyman in the field.

QUALIFICATION REQUIREMENTS:

Requires demonstrated capability of competent performance in various aspects of programmer/analyst activities plus a Bachelor's degree in mathematics, computer science or business, or equivalent experience.

C. E. Naugle, Director
Industrial Relations Division
CLASSIFICATION: Programmer/Analyst III

APPLICABLE LOCATION(S): Las Vegas, Los Alamos, San Ramon, Santa Barbara, and Kirtland

JOB DESCRIPTION:

Under general supervision, provides computer programming for business, scientific, or engineering applications. Develops computer system specifications, algorithms, and database structures. Confers with managers, scientists, and engineers to determine the problem and type of data to be processed. Analyzes problems in terms of an overall system of programming requirements, and designs solutions to take maximum advantage of the existing equipment. May recommend equipment modifications or additions to provide an efficient application. Advises and consults on the implementation of programming applications. Devises data verification methods and standard operating procedures. Usually is competent to work independently when programming, but may require general direction and instruction when developing specifications dealing with very complex applications. May provide technical assistance to lower classifications.

QUALIFICATION REQUIREMENTS:

Requires demonstrated proficiency at a high programmer/analyst level plus a Bachelor's degree in mathematics, computer science, or business, or equivalent experience.

C. E. Naugle, Director
Industrial Relations Division
CLASSIFICATION: Programmer III Scientific

JOB DESCRIPTION:

Concentrates general programming experience into the analysis, design, formulation, or implementation of complex computer programs and systems. Establishes system requirements by determining specific objectives sought by each organizational unit concerned. Reviews hardware capabilities and new technological changes. Analyzes cost and quality choices as a basis for determining the feasibility of various system approaches. Submits, for management approval, proposals for new or revised programming systems. Formulates design specifications to meet the objectives of new or revised systems. Writes general and/or detailed flow charts for major new or revised complex programming systems. Requires general supervision.

QUALIFICATION REQUIREMENTS:

Master's degree in Computer Science or Mathematics, plus three (3) years' experience or Bachelor's degree in Computer Science or Mathematics, plus six (6) years' experience in scientific EDP systems programming, or an equivalent background and experience. Specialized depth experience to build efficiencies and economics into the complete computer operation.

Source: LVO IR Approved: C. Nangle

EG&G ENERGY MEASUREMENTS, INC.
CAP BUDGET PROPOSAL - MARCH 1, 1990
QUALITY IMPROVEMENT SPECIALIST

Job Description:
The employee will be responsible to conduct Quality Improvement Team meetings by acting as the team facilitator and diagnostican; apply diagnostic and analytical skills to data collected by quality improvement teams to demonstrate and teach the diagnostic portions of the quality improvement process; teach quality improvement tools to managers, professional and other employees; prepare PERT and GANTT charts that reflect the progress of quality improvement projects; support quality improvement teams in the identification and application of applicable resources; communicate quality improvement techniques and information to higher management for implementation into EG&G/EM's quality improvement process; and participate in the preparation and submission of EG&G/EM's application for the Malcolm Baldrige Quality Award. Travel will be required.

Qualification Requirements:
Professional experience in the development of plans, i.e. PERT, financial, etc., analysis of data and the preparation of management presentations and reports as would normally be acquired in a bachelor's degree program in business administration or related field plus experience working on progressively more difficult assignments in the above areas. Experience sufficient to enable employee to effectively implement productivity improvement processes affecting EM. Knowledge of the quality inspection process and skill to effectively communicate these techniques to quality teams. Skilled in the tools and concepts of quality improvement, including approaches that can help a team have effective, productive meetings, help facilitate the teams work and coach team members in needed skills and tools. Understanding of basic scientific tools i.e., statistical approaches to problem solving and the use of data; knowledge and skill to teach data collection and analysis techniques to the team and show what conclusions may or may not be drawn from data; organization and planning skills to organize and plan projects; an understanding of the technical aspects of assigned projects; and skill to ask good questions. Demonstrated ability to perform analysis on complex sets of data resulting from quality improvement projects to make decisions that guide teams through the improvement process and keep projects on track. Demonstrated sensitivity towards people. Interpersonal communication, group process and meeting skills; skill to form groups, build teams, listen, resolve conflict, and give feedback. Willingness to continually develop personal skills in facilitating group processes and planning. Experience as a trainer or facilitator and skill to lead managers and professionals in team activities. Skill to give effective presentations to management groups, employee groups and to customers. Demonstrated ability to present (oral and written) technical, instructional and informative material, reports, studies, and recommendations on Quality Improvement issues and practices. Familiarity with microcomputer applications including graphics and planning software. Demonstrated ability to maintain effective relationships with supervisors, employees, administrators, and operating officials.
JOB DESCRIPTION:

Assignments are designed to familiarize the Quality Specialist I with basic procedures and techniques, pertinent regulations and program requirements with the main goal of expanding the employee's audit scope. Act as QA auditor in area of records management and document control. Maintain QA records designation list and coordinate with Central Files on QA record matters. Prepare final audit checklists and audit reports. Finalize QA group correspondence, including ensuring proper codes are referenced, spelling, proofing, checking dates, etc., and analyze and flag for problems. Enter and expand pertinent data elements; and screen and enter boilerplate specifications prior to release for distribution. Monitor follow-up audits/surveillance; maintain status on open QA items and activities; and maintain commitment tracking program. Control and maintain audit schedules and prepare appropriate notification letter/memoranda. Perform surveillances of Central Record Facility and open items status. Participate in quality/productivity processes (root cause analysis). Perform related duties as required. Occasional overtime, weekend work and domestic travel may be required.

QUALIFICATION REQUIREMENTS:

Associate degree in a related discipline or equivalent training and experience; plus two or more years related experience. Training will be provided to achieve initial proficiency; maintain proficiency and adapt to changes in technology, methods or job responsibilities. Skill to perform and document the results of inspections or tests that are required to be performed in accordance with documented procedures, acceptance standards and/or industry practices. Computer skills to utilize various PC based spreadsheet, graphic, and word processing software. Skill in data and program manipulation. Skill to interpret QA regulation, requirements and other guideline material. Demonstrated ability to establish and maintain effective interrelationships with personnel at all levels both inside and outside the Company. Organization skills, detail-mindedness, and skill to work effectively in a position that has numerous, continuous deadlines.
DESIRED EXPERIENCE AND BACKGROUND:

Familiarity with applicable codes, standards and company procedures; applicable quality assurance program elements; and job responsibilities and authority.

CPM network experience.
JOB DESCRIPTION:

Direct specific audit/surveillance processes, e.g., ensure audit/surveillance teams are sufficiently oriented to specific audit/surveillance tasks; assure appropriate procedures and checklists are prepared; select audit team members, including technical personnel; and evaluate performance of auditors and auditors-in-training. Review applicable consensus codes and standards for applicability of quality requirements to EG&G/EM operations, functions, and tasks, and document these reviews. Develop, compose and finalize assigned QA correspondence and transmittals, checklists, reports, orientation agendas, and audit debriefing/closing meetings. Finalize QA group correspondence; ensure accuracy of content and form appropriate to circumstances; ensure proper codes are referenced and pertinent tracking information is entered. Control and maintain assigned audits, associated schedules, and prepare appropriate notification letter/memoranda. Ensure timely preparation of final audit checklists and audit reports and ensure appropriateness to audit/surveillance scope. Monitor follow-up audits/survelliances. Participate in training seminars as lecturer and student. Assist line personnel and management in determining applicability of QA codes, standards, and directives; and means and methods for establishing and controlling the quality of those activities and processes in a systematic manner. Participate in training seminars as a lecturer and student. Perform related duties as required. Occasional overtime, weekend work and considerable domestic travel may be required.

QUALIFICATION REQUIREMENTS:

Associate degree in a related discipline plus four or more years related experience in equivalent compliance activities. Knowledge of established techniques, regulations, and requirements related to QA operations, including program and procedures per NQA-1, as well as management information systems control, and skill in applying this knowledge to plan and perform a variety of assignments. Experience with QA records management and document control processes. Practical knowledge of factfinding or investigative techniques, and skill to develop, analyze, and evaluate facts relative to unsatisfactory conditions or trends, and prepare documented reports of finding. Skill to perform and document the results of inspections or tests that are required to be performed in accordance with documented procedures, acceptance standards, and/or industry practices. Demonstrated ability in planning inspections and tests; in setting up tests, including preparation and setup of related equipment; in supervising or maintaining
surveillance over the inspections and test; in supervising and certifying lower level personnel and in evaluating the validity and acceptability of inspection and test results. Skill to communicate effectively both orally and in writing. Demonstrated skill in maintaining effective working relationships with all levels of personnel both inside and outside the Company. Computer skills to utilize PC based software. Must be able to meet requirements for certification as a Lead Auditor in accordance with ASME NQA-1.

DESIRED EXPERIENCE AND BACKGROUND:

Knowledge of EG&G/EM operations, functions, and tasks.

Knowledge of EG&G/EM policies and procedures.

HR Comp
July 1990
JOB DESCRIPTION:

Establishes and maintains quality assurance programs, procedures and controls ensuring that performance and quality of products conform to established codes and standards necessary to maintain lasting customer satisfaction. Works directly with organizations to conduct inspections and audits and enforce requirements.
