Food and Drug Administration

Assuring Radiation Protection; Cooperative Agreement; Request for Applications: RFA-FDA-CDRH-07-004; Catalog of Federal Domestic Assistance Number: 93.103

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

I. Funding Opportunity Description

The Food and Drug Administration (FDA) is announcing its intention to receive and consider applications for the award of a cooperative agreement in fiscal year 2007 (FY07) to provide support in furtherance of FDA’s responsibilities, under section 532 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360ii), to establish and carry out a comprehensive radiation control program. An estimated amount of support in FY07 will be for up to $400,000, with an additional 5 years of support, subject to the condition that in addition to FDA funds, augmenting funds are transferred to FDA from other Federal agencies to fully support this program. Funds may not be used to fund or conduct international activities or initiatives. As the lead Federal agency, FDA intends to collect funds from all other contributing Federal agencies through Interagency Agreements and fund one award for up to $400,000 in total costs (including both direct and indirect costs). After the first year, additional years of noncompetitive support are predicated upon acceptable performance during the preceding year and the availability of Federal funds. The cooperative agreement will allow FDA to continue to work with the Nuclear Regulatory Commission and its predecessor organizations, the Environmental Protection Agency and the Federal Emergency Management Agency, to provide financial support for a forum established to foster the exchange of ideas and information
