

# Fire Fighter SCBA Evaluations – FY12 (927ZKRC)

## Objective

- To evaluate SCBA performance in support of the investigation of firefighter injuries or fatalities that involve the use of approved SCBA and provide findings to accident investigators and stakeholders

## Applicable Standards

- 42 CFR 84
- Statement of Standard for CBRN SCBA
- NFPA 1981

## Key Partners

- NIOSH DSR
- NIOSH DSHEFS

## Stakeholders

- IAFF
- NFPA
- Other firefighting users
- SEI

## Project Scope

- Conduct investigations of SCBAs involved in line-of-duty deaths and injuries to fire fighters in conjunction with the FFFIPP

## Milestones

- The project is now contained under the PCE team
- This CAN number will be terminated and the SCBA evaluations will be combined with the clothing evaluations under CAN # 927ZKRB

## Intermediate Outcome

- Better understanding of conformance status of SCBA involved in injury or fatality

## Outcomes

- Use of findings and information by users and standards development organizations

## Outputs

- Reports on SCBA evaluations
- Findings on issues or trends related to SCBA performance and use
