

Healthcare Respiratory Protection Program Toolkit & Monograph FY13 (939ZNRV)

Objective

To disseminate the National Respiratory Protection Program Toolkit, TJC Monograph and AAOHN training modules to hospitals across the US and provide new content and resources to better educate healthcare workers and nursing students about proper respirator use (i.e. when to use and how to don/doff).

Applicable standards

- 29 CFR Part 1910.134

Key Partners

CDPH	TJC
ACOEM	ANA
AOHP	OSHA
ABOHN	AHA
AAOHN	SEIU/AFL-CIO

Stakeholders

- Healthcare workers
- Professional guidance and standards organizations

Project Scope

Applying the findings from REACH I & II, North Carolina and the AAOHN survey to provide hospitals and nursing educational programs with a toolkit of resources and effective, innovative best practices to reinforce knowledge and proper use of respiratory protection in : hospitals' respiratory protection programs, OHN certification and healthcare workers and students daily usage

Milestones

- 3QFY13 – Develop a dissemination strategic plan
- 1QFY14 – Completion of a dissemination strategic plan
- 2QFY14 – Targeted translation efforts with key partners
- 3QFY14 – Evaluation of dissemination effectiveness

Budget

FY12 - \$25K additional needed to address sensitivity testing
FY13 - \$125K (on track)
FY14 - \$125K

Outputs

- Presentations at conferences -4
- Standards committee/stakeholder presentations
- Published manuscript in peer-reviewed journal- 3
- Toolkit resources posted to web (OSHA/NIOSH)-July/August 2013
