

Eye Safety Checklist

1. Create a safe work environment

- Minimize hazards from falling or unstable debris.
- Make sure that tools work and safety features (machine guards) are in place.
- Make sure that workers (particularly volunteers) know how to use tools properly.
- Keep bystanders out of the hazard area.

2. Evaluate safety hazards.

- Identify the primary hazards at the site.
- Identify hazards posed by nearby workers, large machinery, and falling/shifting debris.

3. Wear the proper eye and face protection.

- Select the appropriate Z87 eye protection for the hazard.
- Make sure the eye protection is in good condition.
- Make sure the eye protection fits and will stay in place.

4. Use good work practices.

- Caution—Brush, shake, or vacuum dust and debris from hardhats, hair, forehead, or the top of the eye protection before removing the protection.
- Do not rub eyes with dirty hands or clothing.
- Clean eyewear regularly.

5. Prepare for eye injuries and first aid needs. Have an eye wash or sterile solution on hand.
