

### **Rates of Work-related Injuries among Youth Reported by Farm Operators, United States**

This graph shows rates of work-related injuries among 15 to 17 year olds reported by farm operators in the United States for 7 points in time between 1998 and 2014. Rates steadily declined from a high of 9.6 injuries per 1,000 youth working on farms in 1998 to 3.7 injuries per 1,000 youth working on farms in 2012, before showing an increase in 2014 to 5.6 injuries per 1,000 youth working on farms. *(Source: NIOSH Childhood Agricultural Injury Survey.)*
