COMMUNICATING AND COLLABORATING FOR THE RIGHT LAB TEST AND DIAGNOSIS
PD2704

PROGRAM DESCRIPTION: This podcast is designed to improve the use of laboratory services and facilitate collaborative clinical decision making among primary care physicians and laboratory professionals when selecting the most appropriate laboratory test. Content is derived from a scenario based skit between a clinical pathologist and primary care physician that offers insight on the importance of clearly communicating with laboratory professionals to ensure that the most accurate laboratory test is selected in order to obtain an accurate clinical diagnosis for quality patient care.

OBJECTIVES:

At the conclusion of the session, the participant will be able to:

1. Describe at least one diagnostic error related to coagulation testing
2. Identify at least two clinical laboratory challenges experienced by clinicians
3. List two ways to improve team based care among laboratory professionals and clinicians

FACULTY/

Mike Laposata, M.D., Ph.D,
Professor and Chairperson

Jim Meisel, M.D., FACP
Associate Professor of Medicine and Medical Director
Boston University School of Medicine

CREDENTIALS:

University of Texas Medical Branch-Galveston

ORIGINATION DATE
