

LOGIC MODEL

COMPREHENSIVE DENTAL SEALANT PROGRAM

RESOURCES

- Statewide program coordinator
- Support staff
- Volunteer staff
- Funding
- Equipment and materials

SUPPORT

- Local advisory group connected to larger state oral health coalition
- Referral network
- Community participation
- Program champion

ACTIVITIES

- Build trust
- Conduct environment assessment
- Develop logic model and evaluation plan
- Select participating schools
- Conduct pre-sealant day activities
- Provide sealant day(s)
- Conduct post-sealant day(s) follow-up
- Promote environment and policy changes designed to sustain program
- Evaluation feedback for program improvement

INTERMEDIATE OUTCOMES

- More children have sealants
- Increased sealant retention in mouth
- Systems change—more supportive environment
- Policy change—more resources for oral health activities
- Behavior change—increase in number of participating schools; increase in referrals for follow-up dental care
- Increase in oral health education
- Program becomes part of infrastructure of state/community oral health programs

LONG-TERM OUTCOMES

- Reduction of dental caries in children
- Reduction of disparities in percent children with sealants in priority populations
- Evidence of change in public health systems and community to more support for positive oral health behaviors
- Sustainable programs
