

PUBLIC HEALTH EMERGENCY PREPAREDNESS COOPERATIVE AGREEMENT (PHEP) PROGRAM

CALIFORNIA

PHEP Then

In response to the deadly events of September 11, 2001, and the subsequent anthrax attacks, Congress established a new program to help health departments across the nation prepare for emergencies. Since then CDC's [Public Health Emergency Preparedness \(PHEP\) program](#) has partnered with state, local, and territorial public health departments to prepare for, withstand, and recover from potentially devastating public health emergencies.

Every year since, the PHEP program has provided vital resources to ensure communities can effectively respond to infectious disease outbreaks, natural disasters, and chemical, biological, radiological, or nuclear events.

PHEP Now

In 2018, PHEP provided \$620 million across public health departments to improve response readiness. Funds are also used to support epidemiologists (disease detectives), lab staff, planners, and other preparedness staff on the ground.

In the future, CDC will continue supporting PHEP recipients by sharing technical expertise, best practices, and lessons learned, along with tools and resources to identify and address gaps.

AT A GLANCE

In California

- ▶ **39.5 million residents**
- ▶ **79%** reside in Cities Readiness Initiative metropolitan statistical areas (CRI MSA). A federally funded program, CRI helps cities effectively respond to large-scale public health emergencies requiring life-saving medications and medical supplies.
- ▶ **61** local public health departments

Frequent Public Health Emergencies

- ▶ Wildfires
- ▶ Flooding
- ▶ Mudslides

Key Emergency Operations Center Activations

- ▶ 2016: Zika & Ebola Responses
- ▶ 2017: Meningococcal & Hepatitis A

PHEP funds programs and activities that build and strengthen the nation's preparedness for public health emergencies.

Preparedness and Response Funding Snapshot

FY 2018 PHEP \$43,562,252

Base Plus Population \$35,976,191
Cities Readiness Initiative \$5,265,278
Level 1 Chemical Lab \$2,320,783

PHEP IN ACTION— PHEP HELPS KEEP HOSPITAL PATIENTS SAFE DURING CALIFORNIA WILDFIRES

Photo Courtesy of California Department of Public Health

In California, PHEP supports planning and exercising of emergency response plans with community partners to keep healthcare facility patients safe during a disaster. In 2017, nearly 9,000 fires burned 1.2 million acres in California, destroying more than 10,800 structures and killing at least 46 people. The state evacuated more than 1,160 patients from healthcare facilities threatened by the fires, including patients with developmental disabilities from the Sonoma Developmental Center. After the fires, California National Guard troops helped clean the center. This partnership, built through PHEP, helped more than 200 developmentally disabled patients safely return to their facility.

CDC identified 15 public health preparedness capabilities critical to public health preparedness.

2018 CALIFORNIA TOP PHEP CAPABILITY INVESTMENTS

1. Public Health Laboratory Testing
2. Community Preparedness
3. Public Health Surveillance & Epidemiologic Investigation
4. Emergency Operations Coordination
5. Medical Countermeasure Dispensing

For a complete list of all 15 public health preparedness capabilities, visit <https://www.cdc.gov/cpr/readiness/capabilities.htm>.

Medical Countermeasure Readiness: Ensuring that medicine and supplies get to those who need them most during an emergency.

KEY STRENGTH

Emergency Information Systems and joint information operations tested in “real world” incidents

KEY CHALLENGE

Distribution elements lacks detailed cold chain procedures

States, territories, and localities are required to develop emergency plans covering children, pregnant women, and other vulnerable populations.

Population	2017
Households included children	40%
Respondents who know they are pregnant	4%
Respondents 65 or older	18%
Respondents who reported having diabetes	10%
Respondents who reported a condition that limits activities	–
Respondents who reported a health problem that required the use of specialized equipment	–

PHEP funds support staff who have expertise in many different areas.

PHEP-Funded Staff	2017
CDC Field Staff	4
Educators	2
Epidemiologists	6
Health Professionals	4
Laboratorians	15
Other Staff	25

PHEP PROGRAM—KEY PERFORMANCE MEASURE RESULTS

In an emergency, it is critical that staff can meet quickly to plan for, lead, and manage a public health response. Public health staff serve as Incident Commanders, Public Information Officers, Planning Section Chiefs, Operations Section Chiefs, and other response roles.

Emergency Operations Coordination	2015	2016	2017
Number of minutes for public health staff with incident management lead roles to report for immediate duty	60	27	5

Timely and effective communication between lab and epidemiologic staff can reduce death and injuries in a public health emergency.

Public Health Laboratory Testing	2017
Results of communication drills between laboratory and epidemiological staff completed within 45 minutes	Drill 1: Completed drill in time Drill 2: Completed drill in time

Laboratory Response Network biological (LRN-B) and PulseNet labs rapidly identify and notify CDC of potential biological health threats to minimize disease outbreaks. CDC manages the LRN-B, a group of public health labs with testing capabilities to detect and confirm biological health threats. CDC also manages PulseNet, a national network of labs that analyzes and connects foodborne illness cases together to identify outbreak sources.

Current number of LRN-B public health labs: 14

Public Health Laboratory Testing: LRN-B	2015	2016	2017
Proportion of LRN-B proficiency tests passed	2/2	1/2	2/2

Public Health Laboratory Testing: PulseNet	2015	2016	2017
Percentage of <i>E. coli</i> -positive tests analyzed and uploaded into PulseNet national database within four working days	98% (target: 90%)	93% (target: 90%)	99% (target: 90%)
Percentage of <i>Listeria</i> -positive tests analyzed and uploaded into PulseNet national database within four working days	96% (target: 90%)	93% (target: 90%)	95% (target: 90%)

LRN chemical (LRN-C) labs rapidly identify exposures to toxic chemicals, aid diagnoses, and minimize further human exposures. CDC manages the LRN-C, a group of labs with testing capabilities to detect and confirm chemical health threats. LRN-C labs are designated as Level 1, 2, or 3, with Level 1 labs demonstrating the most advanced capabilities.

Current number and level of LRN-C Labs: 1 (Level 1)

Public Health Laboratory Testing: LRN-C	2015	2016	2017
Proportion of core chemical agent detection methods demonstrated by Level 1 or Level 2 labs	9/9	9/9	9/9
Number of additional chemical agent detection methods demonstrated by Level 1 or Level 2 labs	4	3	4
Result of LRN exercise to collect, package, and ship samples	Passed	Passed	Passed
