1. Prioritize a risk-based approach to all-hazards planning that addresses evolving threats and supports medical countermeasure logistics.

2. Enhance partnerships (federal and nongovernmental organizations) to effectively support community preparedness efforts.

3. Expand local support to improve jurisdictional readiness to effectively manage public health emergencies.

4. Improve administrative and budget preparedness systems to ensure timely access to resources for supporting jurisdictional responses.

5. Build workforce capacity to meet jurisdictional surge management needs and support staff recruitment, retention, resilience, and mental health.

6. Modernize data collection and systems to improve situational awareness and information sharing with healthcare systems and other partners.

7. Strengthen risk communications activities to improve proficiency in disseminating critical public health information and warnings and address misinformation.

8. Incorporate health equity practices to enhance preparedness and response support for communities experiencing differences in health status due to structural barriers.

9. Advance capacity and capability of public health laboratories to characterize emerging public health threats through testing and surveillance.

10. Prioritize community recovery efforts to support health department reconstitution and incorporate lessons learned from public health emergency responses.
