

NALOXONE CAN REVERSE OPIOID OVERDOSE

NALOXONE SAVES LIVES

NALOXONE CAN QUICKLY REVERSE THE EFFECTS OF OPIOID OVERDOSE AND RESTORE NORMAL BREATHING.

If you witness an overdose, call 911 immediately, administer naloxone, and wait for help to arrive.

HOW TO ADMINISTER NALOXONE

1

Lay person on their back.

2

Remove tab to open packaging.

3

Insert nozzle into one nostril and press plunger to give the full dose.

4

If the person does not respond in 2-3 minutes, give them a second dose in the opposite nostril.
