

TPOXX IND Registry for Providers and Facilities

Why register?

An online registry is now available for providers and affiliated medical facilities providing tecovirimat (TPOXX) under the CDC-held expanded access Investigational New Drug (IND) protocol to register. All new providers must register with the TPOXX IND Online Registry.

- The TPOXX IND Online Registry enables compliance with IND regulations.
- Providers must be registered to access electronic TPOXX IND forms for convenient, time-efficient, and secure completion and submission to CDC. Forms include:
 - Form FDA 1572 (Statement of Investigator) (Required)
 - Patient Intake Form (Required)
 - Clinical Outcome Form (Optional)
- The online registry provides an up-to-date list of participating providers and facilities under the TPOXX IND protocol. This will help state and health departments guide pre-positioning and distribution of TPOXX, inform treatment access, and identify distribution and treatment gaps.

Note: Providers who submitted TPOXX IND forms with a valid email to CDC prior to the online registry are grandfathered in as registered providers and should receive a verification email automatically.

Steps to Register and Access Electronic Patient Intake and Clinical Outcome Forms

Register Online

- [Register](#) as participating providers and facilities to be covered under the CDC-held TPOXX IND protocol.
- The electronic Form FDA 1572 can be completed through the online registry if it was not previously submitted to CDC.

Complete Verification

- Upon registration, the provider will receive the first email from “CDC IMS TPOXXIND <noreply@dcipher.cdc.gov>” confirming registry as a participating provider to prescribe, dispense, and/or administer TPOXX under the CDC-held IND.
- Please complete the brief verification steps included in the email to access the electronic Patient Intake and Clinical Outcome Forms.

Grandfathered Providers

- A provider who has submitted TPOXX IND forms to CDC with a valid email address prior to online registry activation (“grandfathered providers”) will automatically receive the verification email described in step 2.
- Any provider who does not receive this email must register through the [TPOXX IND Online Registry](#).

Access Patient Intake Form (Required)

- Upon verification, a provider will receive a second email with a secure link to electronically fill out the Patient Intake Form.
- The secure link can be accessed multiple times to complete the form for each patient treated.
- For each patient treated with TPOXX, providers must submit the completed form to CDC within 7 days of therapy initiation.
- **Note:** For security reasons, the form must be completed and submitted in one sitting.

Access Clinical Outcome Form (Optional)

- Upon verification, a provider will receive a third email with a secure link to electronically fill out the Clinical Outcome Form.
- The secure link can be accessed multiple times to complete the form for each patient treated.
- For each patient treated with TPOXX, providers are requested to submit the form to CDC within 7 days of the last patient follow up.
- **Note:** For security reasons, the form must be completed and submitted in one sitting.

For any questions regarding the TPOXX IND Online Registry and/or electronic forms, please email CDC IMS TPOXXIND.
