^a All preconception health indicators in CPONDER include the designation (*PCH) in their label.

^b Unless otherwise stated the denominator for all indicators is women aged 18–44 years who delivered a live-born infant.

^c Core questions are available for all PRAMS states.

^d Standard questions are not available for all PRAMS states.

^e PRAMS preconception health indicators are only defined for women aged 18–44 years but PRAMS data include women of all ages who had a live birth. To restrict the estimates to women aged 18–44 years in CPONDER, use the breakout variable “Break out by Maternal Age — 18–44 years only.”

^f PRAMS states must reach or exceed the response rate threshold of 70% (for 2000–2006) and 65% (for 2007 and beyond) for their data to be included in CPONDER.
