ABOUT THIS DOCUMENT

This document includes all core, standard, and state-developed questions available for the Pregnancy Risk Assessment Monitoring System (PRAMS) Phase Seven questionnaire organized by topic. Many questions are related to more than one topic. Questions are listed under the one topic that best captures the question’s intent and content. Cross-references to related topics and questions are included.

Within each topic or sub-topic, questions are organized into three categories: Core, Standard, and State-Developed. Core questions are listed sequentially within a topic, with the question number from the basic core questionnaire (without inserted standard questions) cited. Likewise, standard questions are listed sequentially within a topic, with the number of the standard question cited, the states using the question listed, the number of the standard question as it appears in the state’s questionnaire cited, and any modifications made to the question by a particular state listed. State-developed questions are organized alphabetically by state within a topic, with the state and question number both cited. In the case where there are no questions pertaining to a topic within one of the three categories (core, standard, and state-developed), that category is omitted. All questions are shown in English and are in the form used in the self-administered mail questionnaires. Interviewer-administered versions and Spanish translations are also available.
