

Prescription opioids can be  
addictive and dangerous.

““ There’s a better life.  
You don’t have to  
live in the dark. ””

Opioid Treatment Program

Directory by State: **[dpt2.samhsa.gov/treatment/directory.aspx](https://dpt2.samhsa.gov/treatment/directory.aspx)**

**Call 911 right away if you  
suspect an overdose.  
Give naloxone if available.**

## What you need to know about treatment and recovery:

- Opioid use disorder is a chronic and relapsing disease that affects the body and brain.
- Treatment can help people struggling with opioid use disorder and can prevent overdose deaths.
- No single treatment method is right for everyone, but combining behavioral therapy with medication is proven to be the most effective approach.
