

**New Federal Guidance on HIV Prevention and Care:  
Implications for providers of STD and sexual health services**

**Atlanta – Grand Ballroom A  
Sunday, June 8, 2014  
3:30-5:30 PM**

**Introduction**

This session will describe new federal government guidance on HIV prevention and care that has been disseminated since 2013. New guidance includes recommendations on HIV testing, case reporting, surveillance, treatment and other clinical services, partner services, prevention, and prophylaxis to prevent HIV acquisition.

The presentations will highlight recommendations most relevant to providers of STD and sexual health services, including clinicians, nonclinical prevention providers and health department staff. The session will also describe new strategies, tools, and collaborations that will help implement new guidance documents.
