

# NALOXONE CAN REVERSE OPIOID OVERDOSE

# NALOXONE SAVES LIVES

**NALOXONE CAN QUICKLY REVERSE THE EFFECTS OF OPIOID OVERDOSE AND RESTORE NORMAL BREATHING.**

**If you witness an overdose, call 911 immediately, administer naloxone, and wait for help to arrive.**

## HOW TO ADMINISTER NALOXONE

- 1** Lay person on their back.
- 2** Remove tab to open packaging.
- 3** Insert nozzle into one nostril and press plunger to give the full dose.
- 4** If the person does not respond in 2-3 minutes, give them a second dose in the opposite nostril.
