Eliminating Syphilis -- San Diego County, CA

Key features of syphilis in the U.S. in 2004

Syphilis is a preventable and curable sexually transmitted disease (STD). Syphilis disproportionately affects a small percentage of the population and research shows that these are often isolated groups involved in high-risk activities such as illicit drug use, exchanging sex for money or drugs, unprotected sexual intercourse and having multiple sex partners.

- U.S. primary and secondary (P&S) syphilis rate in 2004 was 2.7 cases/100,000 population (7,980 cases).
- U.S. congenital syphilis rate was 8.8 cases/100,000 live births (353 cases).
- Half of U.S. P&S cases in 2004 were in 20 counties, less than 1% of 3,140 counties.

Key features of syphilis in San Diego County, CA in 2004

Primary and secondary syphilis cases, rates and rank

- San Diego County, CA's 138 cases ranked 12 among 3,140 U.S. counties.
