WHAT ARE E-CIGARETTES?

Electronic cigarettes (e-cigarettes) are battery-powered devices that deliver nicotine, flavorings, and other ingredients to the user. Using e-cigarettes is sometimes called “vaping.” E-cigarettes do not create harmless “water vapor” – they create an aerosol that can contain harmful chemicals.

HOW MANY YOUTH ARE USING E-CIGARETTES?

- E-cigarettes have been the most commonly used tobacco product among U.S. youth since 2014.
- In 2019, CDC and FDA data showed that more than 5 million U.S. youth, including over 1 in 4 high school students and about 1 in 10 middle school students, used e-cigarettes in the past 30 days.
- During 2017 and 2018, e-cigarette use skyrocketed among youth, leading the U.S. Surgeon General to call the use of these products among youth an epidemic in the United States.

WHAT ARE THE RISKS FOR YOUTH?

- Most e-cigarettes contain nicotine, which is highly addictive. Nicotine exposure during adolescence can:
  - Harm brain development, which continues until about age 25.
  - Impact learning, memory, and attention.
  - Increase risk for future addiction to other drugs.
- Young people who use e-cigarettes may be more likely to go on to use regular cigarettes.
- Many e-cigarettes come in kid-friendly flavors – including mango, fruit, and crème – which make e-cigarettes more appealing to young people.
- E-cigarette aerosol is not harmless. It can contain harmful substances, including:
  - Nicotine
  - Ultrafine particles
  - Cancer-causing chemicals
  - Flavorings that have been linked to lung disease
  - Volatile organic compounds
  - Heavy metals such as nickel, tin, and lead
WHAT DO E-CIGARETTES LOOK LIKE?
• E-cigarettes come in many shapes and sizes. Some look like regular cigarettes, cigars, or pipes. Larger e-cigarettes such as tank systems—or “mods”—do not look like other tobacco products.
• Some e-cigarettes look like other items commonly used by youth, such as pens and other everyday items. New e-cigarettes shaped like USB flash drives are popular among youth, including JUUL and the PAX Era, which looks like JUUL and delivers marijuana.

WHAT CAN YOU DO AS A PARENT OR CAREGIVER?
As a parent or caregiver, you have an important role in protecting children from e-cigarettes.

» Talk to your child or teen about why e-cigarettes are harmful for them. It’s never too late.
» Set a good example by being tobacco-free.
» Learn about the different shapes and types of e-cigarettes and the risks of e-cigarette use for young people at CDC.gov/e-cigarettes.

ABOUT USB FLASH DRIVE-SHAPED E-CIGARETTES
As a parent or caregiver, you may have heard about the use of USB flash drive-shaped e-cigarettes, including JUUL (pronounced “jewel”). JUUL is the top-selling e-cigarette brand in the United States.

JUUL is being used by students in schools, including in classrooms and bathrooms. JUUL’s nicotine liquid refills are called “pods.” According to the manufacturer, a single JUUL pod can contain as much nicotine as a pack of 20 regular cigarettes.

JUUL delivers nicotine in a new form called “nicotine salts,” which can make it less harsh on the throat and easier to use by youth. JUUL also comes in flavors that can appeal to youth.
