Tobacco Use Among U.S. Racial/Ethnic Minority Groups

African Americans
American Indians and Alaska Natives
Asian Americans and Pacific Islanders
Hispanics

A Report of the Surgeon General
1998
Foreword

The United States of America is a rich blend of cultures. This diversity demands close attention from the agencies and individuals responsible for protecting the public’s health. For too long in tobacco control, attention to diversity has been less consistent than is necessary for planning and developing effective health programs. As a result, we sometimes lack sufficient information on which to base tobacco control interventions. With this report, we begin to address such problems and point the way to filling these gaps in knowledge.

Tobacco use causes devastating disease and premature death in every population in the United States. For four major U.S. racial/ethnic minority groups—African Americans, American Indians and Alaska Natives, Asian Americans and Pacific Islanders, and Hispanics—patterns of tobacco use, adverse health effects, and the effectiveness of interventions need to be understood in terms of tobacco’s cultural and socioeconomic effects on the members of these groups. This report describes the complex factors that play a part in the growing epidemic of diseases caused by tobacco use in these four groups.

Since 1964 when the first Surgeon General’s report on smoking and health was released, this report is the first to focus exclusively on tobacco use among members of these four racial/ethnic groups. Together these groups constitute about 25 percent of the U.S. population, and that proportion is growing rapidly. Public health programs must effectively address the health needs of this significant proportion of people. Such action is of paramount importance to reducing tobacco use in the United States and meeting national health objectives for the year 2000. We hope that this report will provide the basis for renewing our commitment to develop more effective tobacco control programs and policies for people of every racial and ethnic background. In addition, the report can be used by parents and communities as a tool to develop their own solutions. With continued diligence, we shall strive to reach and exceed whenever possible our stated health goals by the year 2000 and reduce the enormous health burden caused by tobacco products.

Claire V. Broome, M.D.
Acting Director
Centers for Disease Control and Prevention
and
Acting Administrator
Agency for Toxic Substances and Disease Registry
Preface
from the Surgeon General,
U.S. Department of Health and Human Services

Effective strategies are needed to reduce tobacco use among members of U.S. racial/ethnic groups and thus diminish their burden of tobacco-related diseases and deaths. Cigarette smoking is the leading cause of preventable disease and death in the United States. There is enormous potential to reduce heart disease, cancer, stroke, and respiratory disease among members of racial and ethnic groups, who make up the most rapidly growing segment of the U.S. population.

This Surgeon General’s report is the first to address the diverse tobacco control needs of the four major U.S. racial/ethnic minority groups—African Americans, American Indians and Alaska Natives, Asian Americans and Pacific Islanders, and Hispanics. This report is also the only single, comprehensive source of data on each group’s patterns of tobacco use, physical effects related to tobacco smoking and chewing, and societal and psychosocial factors associated with tobacco use.

The findings detailed in this report indicate that if tobacco use is not reduced among members of these four racial/ethnic groups, they will experience increasing morbidity and mortality from tobacco use. The toll is currently highest for African American adults. Findings also suggest that some close, long-term relationships between tobacco companies and various racial/ethnic communities could hamper U.S. efforts to lower rates of tobacco use by the year 2000. Also notable is the support that members of racial/ethnic groups have shown for legislative efforts to control tobacco use, sales, advertising, and promotion.

As this report goes to press, discouraging news comes from a report published by the Centers for Disease Control and Prevention on the Youth Risk Behavior Survey about tobacco use among African American and Hispanic high school students. Past-month smoking increased among African American students by 80 percent and among Hispanic students by 34 percent from 1991 through 1997. The consistent decline once seen among young African Americans has sharply reversed in recent years. Past-month smoking prevalence increased from 13 percent to 23 percent among African Americans and from 25 percent to 34 percent among Hispanics.

Although cancer remains common in Americans of all racial and ethnic groups, the pattern of increasing lung cancer deaths in the 1970s and 1980s among African American, Hispanic, and some American Indian and Alaska Native subgroups has been halted or reversed for some groups from 1990 through 1995. Some encouraging news from Cancer Incidence and Mortality, 1973–1995: A Report Card for the U.S. was just published by the American Cancer Society, the National Cancer Institute, and the Centers for Disease Control and Prevention. The report described lung cancer trend data from 1990 through 1995 for African Americans, Asian Americans and Pacific Islanders, and Hispanics. Lung cancer death rates declined significantly for African American men and for Hispanic men and women from
1990 through 1995; death rates did not change significantly for African American women or for Asian American and Pacific Islander men or women. Although lung cancer trends may continue to decline among some racial/ethnic groups for several more years, recent increases in smoking prevalence among adolescent African Americans and Hispanics and among Asian American and Pacific Islander adolescent males, coupled with the lack of decline among American Indian and Alaska Native adults, do not bode well for long-term trends in lung cancer.

One purpose of this report is to guide researchers in their future efforts to garner more information needed to develop effective prevention and control programs. Several significant research questions need to be addressed. For example, why are African American youths smoking cigarettes in lower proportions than youths in other racial/ethnic groups? How does acculturation affect patterns of tobacco use among immigrants to the United States? What are the differential effects of gender on tobacco use among members of certain racial/ethnic groups? What racial- and ethnic-specific protective factors and risk factors will promote the development of culturally appropriate interventions to prevent and control tobacco use? And to what extent are culturally specific tobacco control programs necessary to curb tobacco use among racial/ethnic populations? While researchers are redirecting their focus, federal, state, and private tobacco control partners need to address program issues, such as how to develop and evaluate culturally appropriate prevention and cessation interventions.

This report includes examples of numerous racial- and ethnic-specific tobacco control programs used in communities across the country. These and other racial/ethnic group-specific programs must be disseminated to all areas of the country, where program planners can develop their own strategies, taking into consideration the cultural attitudes, norms, expectations, and values of the targeted cultural groups.

In each of these endeavors, we will succeed only if we are sensitive to our cultural differences and similarities. I challenge federal and state agencies as well as researchers and practitioners in the social, behavioral, public health, clinical, and biomedical sciences to join me in the pursuit of effective strategies to prevent and control tobacco use among racial/ethnic groups. By meeting this challenge, we will progress toward achieving the nation’s year 2000 tobacco-related health objectives and will help to prevent the unnecessary disability, disease, and deaths that result from tobacco use.

David Satcher, M.D., Ph.D.
Surgeon General
and
Assistant Secretary for Health
Acknowledgments

This report was prepared by the U.S. Department of Health and Human Services under the general direction of the Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Office on Smoking and Health.

Claire V. Broome, M.D., Acting Director, Centers for Disease Control and Prevention, Atlanta, Georgia.

James S. Marks, M.D., M.P.H., Director, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Virginia S. Bales, M.P.H., Deputy Director, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Michael P. Eriksen, Sc.D., Director, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

The editors of the report were

Gerardo Marín, Ph.D., Senior Scientific Editor, Professor, Department of Psychology, University of San Francisco, San Francisco, California.

Gayle Lloyd, M.A., Managing Editor, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Valerie R. Johnson, Senior Editor, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Anne M. Pritchett, Technical Editor, Cygnus Corporation, Rockville, Maryland.

Contributing authors were

Neal L. Benowitz, M.D., Professor and Chief, Division of Clinical Pharmacology, Departments of Medicine, Pharmacy, and Psychiatry, School of Medicine, University of California, San Francisco, California.

Alan Blum, M.D., Associate Professor, Baylor College of Medicine, Houston, Texas.

Ronald L. Braithwaite, Ph.D., Associate Professor, Division of Behavioral Sciences and Health Education, Emory University School of Public Health, Atlanta, Georgia.

Felipe G. Castro, M.S.W., Ph.D., Director, Hispanic Research Center, and Associate Professor, Department of Psychology, Arizona State University, Tempe, Arizona.

Moon S. Chen, Jr., Ph.D., M.P.H., Professor, Department of Preventive Medicine, Ohio State University, Columbus, Ohio.

David B. Coultas, M.D., Associate Professor of Medicine, School of Medicine, University of New Mexico, Albuquerque, New Mexico.

Luis G. Escobedo, M.D., M.P.H., Medical Epidemiologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Dorothy L. Faulkner, Ph.D., M.P.H., Epidemiologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Larri L. Fredericks, Ph.D., M.P.H., Associate Scientist, American Indian Cancer Control Project, Medical Research Institute, Berkeley, California.

Gary A. Giovino, Ph.D., Chief, Epidemiology Branch, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Sandra W. Headen, Ph.D., Assistant Professor, Department of Health Behavior and Health Education, School of Public Health, University of North Carolina, Chapel Hill, North Carolina.

Felicia Schanche Hodge, Dr.P.H., Principal Investigator and Director, Center for American Indian Research and Education, Berkeley, California.

Juliette S. Kendrick, M.D., Medical Epidemiologist, Division of Reproductive Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Gary King, Ph.D., Assistant Professor and Coordinator, Urban Health Research Program, School of Medicine, University of Connecticut Health Center, Farmington, Connecticut.

Beverly S. Kingsley, Ph.D., M.P.H., Epidemiologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Rod Lew, M.P.H., Health Education Director, Asian Health Services, Oakland, California.

Ann M. Malarcher, Ph.D., Epidemiologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Robert K. Merritt, M.A., Health Scientist, Division of Reproductive Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Michael D. Newcomb, Ph.D., Professor, Department of Psychology, University of California, Los Angeles, California.

John P. Peddicord, M.S., Computer Scientist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Richard Pollay, Ph.D., Professor of Marketing, and Curator, History of Advertising Archives, University of British Columbia, Vancouver, British Columbia, Canada.

Amelie G. Ramirez, Dr.P.H., Associate Professor, Department of Family Practice, University of Texas, and Director, South Texas Health Research Center, San Antonio, Texas.

Patricia A. Richter, Ph.D., M.P.H., Toxicologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Robert G. Robinson, Dr.P.H., Associate Director for Program Development, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Richard B. Rothenberg, M.D., M.P.H., Professor, Department of Family and Preventive Medicine, Emory University School of Medicine, Atlanta, Georgia.

Jonathan M. Samet, M.D., Chairman, Department of Epidemiology, School of Hygiene and Public Health, The Johns Hopkins University, Baltimore, Maryland.

Michael W. Schooley, M.P.H., Epidemiologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Dana Shelton, M.P.H., Epidemiologist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Michael B. Siegel, M.D., M.P.H., Assistant Professor, Boston University School of Public Health, Boston, Massachusetts.

Charyn D. Sutton, President, The Onyx Group, Bala Cynwyd, Pennsylvania.

Scott L. Tomar, D.M.D., Dr.P.H., Assistant Professor, Department of Dental Public Health and Hygiene, School of Dentistry, University of California, San Francisco, California.

Bao-Ping Zhu, M.S., M.B.B.S., Ph.D., Visiting Scientist, Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Reviewers were

Jasjit S. Ahluwalia, M.D., M.P.H., M.S., Assistant Professor of Medicine, Emory University School of Medicine, Atlanta, Georgia.

David G. Altman, Ph.D., Associate Professor, Department of Public Health Sciences, Bowman Gray School of Medicine, Wake Forest University, Winston-Salem, North Carolina.
John H. Holbrook, M.D., Director of Internal Medicine, University of Utah Hospital, Salt Lake City, Utah.

Thomas Houston, M.D., Director, Department of Preventive Medicine and Public Health, American Medical Association, Chicago, Illinois.

Rudolph S. Jackson, Dr.P.H., Professor, Department of Health Education, North Carolina Central University, Durham, North Carolina.

Elaine M. Johnson, Ph.D., Director, Center for Substance Abuse Prevention, Substance Abuse and Mental Health Services Administration, Rockville, Maryland.

Nora L. Keenan, Ph.D., Epidemiologist, Office of Surveillance and Analysis, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, Atlanta, Georgia.

Monina Klevens, D.D.S., M.P.H., Medical Officer, Division of HIV/AIDS, National Center for Infectious Diseases, Centers for Disease Control and Prevention, Atlanta, Georgia.

Norman A. Krasnegor, Ph.D., Chief, Human Learning and Behavior Branch, Center for Research for Mothers and Children, National Institute of Child Health and Human Development, National Institutes of Health, Bethesda, Maryland.

Leonard E. Lawrence, M.D., President, National Medical Association, University of Texas Health Sciences Center at San Antonio, San Antonio, Texas.

Edward Lichtenstein, Ph.D., Research Scientist, Oregon Research Institute, Eugene, Oregon.

Douglas S. Lloyd, M.D., M.P.H., Associate Administrator for Public Health Practice, Health Resources and Services Administration, U.S. Department of Health and Human Services, Rockville, Maryland.

Judith Mackay, M.B.E., J.P., F.R.C.P., Director, Asian Consultancy on Tobacco Control, Kowloon, Hong Kong.

Audrey F. Manley, M.D., M.P.H., President, Spelman College, Atlanta, Georgia.

Tobacco Use Among U.S. Racial/Ethnic Minority Groups

Chapter 1. Introduction and Summary of Conclusions  3

Chapter 2. Patterns of Tobacco Use Among Four Racial/Ethnic Minority Groups  19
  Introduction  21
  Long-Term Tobacco-Use Trends and Behavior Among Racial/Ethnic Minority Groups  22
  Retrospective Analyses of Smoking Prevalence Among African Americans and Hispanics  74
  Effects of Education and Race/Ethnicity on Cigarette-Smoking Behavior  83
  Exposure to Environmental Tobacco Smoke  86
  Comparisons Between Racial/Ethnic Minority Groups in Current Tobacco Use  87

Chapter 3. Health Consequences of Tobacco Use Among Four Racial/Ethnic Minority Groups  135
  Introduction  137
  Lung Cancer  137
  Other Cancers  149
  Chronic Obstructive Pulmonary Disease  158
  Coronary Heart Disease  160
  Cerebrovascular Disease  164
  Smoking and Pregnancy  166
  Summary of Health Consequences from Active Cigarette Smoking  172
  Effects of Exposure to Environmental Tobacco Smoke  172
  Effects of Smokeless Tobacco Use  174
  Nicotine Addiction and Racial/Ethnic Differences  175

Chapter 4. Factors That Influence Tobacco Use Among Four Racial/Ethnic Minority Groups  205
  Introduction  207
  Historical Context of Tobacco  208
  Economic Influences  213
  Advertising and Promotion  220
  Psychosocial Determinants  225

Chapter 5. Tobacco Control and Education Efforts Among Members of Four Racial/Ethnic Minority Groups  257
  Introduction  259
  Primary Prevention Efforts  266
  Smoking Cessation Programs  274
  Environmental Tobacco Smoke and Clean Indoor Air Policies  287
  Economic Efforts to Reduce Tobacco Use  292
  Efforts to Control Tobacco Advertising and Promotion  293
  Tobacco Product Regulations  298
