**Alaska Native Adult Tobacco Survey Household Screener  
(Use With the Alaska Native Survey, Household List Version)**

The following script is used to determine (a) if any household (HH) members are eligible and, if there are multiple eligible HH members, (b) which HH member is selected to participate. It is intended for use in conjunction with any sampling plan that first samples HHs and then samples one HH member from among eligible HH members.

If you have any questions about this survey, I will provide a telephone number for you to call to get more information.
