

In January 2018, education leaders from across the Centers for Disease Control and Prevention finalized eight training development standards to serve as a quality benchmark for trainings developed or funded by CDC. The standards provide guidance for developing quality training that results in learning. As part of a routine review, in September 2020, CDC's education leaders determined the standards remain an important tool to help ensure that learning occurs and are especially relevant today in helping learners navigate a rapidly changing environment.

A quality training is one that meets all eight standards

- 1 TRAINING NEEDS ASSESSMENT** informs training development
- Training includes **LEARNING OBJECTIVES**
- Training content is **ACCURATE AND RELEVANT**
- Training includes opportunities for **LEARNER ENGAGEMENT**
- Training is designed for **USABILITY AND ACCESSIBILITY**
- 6 TRAINING EVALUATION** informs improvement
- Training includes opportunity for **LEARNER ASSESSMENT**
- Training includes **FOLLOW-UP SUPPORT FOR THE LEARNER**
