Levels of Endemicity for Hepatitis E Virus (HEV)

- **Highly Endemic**
  - Waterborne outbreaks or confirmed HEV infection in ≥25% of sporadic non-A, non-B hepatitis

- **Endemic**
  - Confirmed HEV infection in <25% of sporadic non-A, non-B hepatitis

- **Not Endemic or Endemicity Unknown**

The map illustrates the distribution of HEV endemicity across the world.
