Total Funding Per Topic:		\$13,691,000
Total Funds Awarded in FY 2026:		\$34,081,116

*Base Funding includes \$208,000 for each of the 26 recipients initially awarded August 30, 2023.

**In Fiscal Year (FY) 2026, Congress required that 3% of CDC's Public Health Infrastructure and Capacity (PHI+C) funding—\$10.8 million—be designated specifically for Tribes and Tribal organizations. To meet this requirement, CDC offered supplemental awards through the Strengthening Public Health Systems and Services in Indian Country cooperative agreement. Of the 34 cooperative agreement recipients, 27 applied for and received supplemental awards ranging from \$15,000 to \$318,000, totaling \$8,283,000. This supplemental funding is in addition to the \$25,798,116 in continuation funding awarded this fiscal year, bringing the total to more than \$34 million. PHI+C funds are available over a two-year period, and the remainder of the \$10.8 million requirement will be awarded in FY2027. Since 2023, more than \$116.5 million has been awarded to Tribes and regional Tribally designated organizations through this cooperative agreement.
