Data Interpretation

- The data provide a useful high-level snapshot of funding to tribes and tribal organizations that can inform more in-depth conversations and engagement
- Various factors make analysis of funding data across fiscal years and jurisdictions difficult to interpret and may lead to inaccurate conclusions in the absence of more in-depth study

Data Interpretation (cont.)

- Factors influencing variation in funding profiles across fiscal years include but are not limited to
 - Changes driven by Congressional authorizations, appropriations, and appropriations committee directions (e.g., decreases or increases in funding for existing programs, establishment or defunding of specified programs or activities and/or grant funding eligibility requirements)
 - Changes in public health and funding strategies based on new information, the latest data, and urgent or emerging health issues/needs
 - Updates in methodology for collecting and presenting the funding data, if applicable
