

Long-term Care Pharmacies Participating in the Federal Retail Pharmacy Program

The following list of long-term care (LTC) pharmacies are enrolled with the federal government to provide COVID-19 vaccine. Jurisdictions can use the Pharmacy Transfer Program to transfer a portion of their vaccine allocation to these LTC pharmacies to help vaccinate LTC facility staff and residents in their communities.

Before submitting a transfer request to CDC, jurisdictions should reach out to the LTC federal pharmacy partner that represents the pharmacies they are interested in providing vaccine to (MHA, GeriMed, or Innovatix) to come up with a vaccination plan (i.e., which LTC pharmacies should receive vaccine and how much, which facilities should be serviced, etc.).

Additionally, in the coming weeks, jurisdictions may request to activate pharmacies below through the [Federal Retail Pharmacy Program](#). Jurisdictions should work with regional teams to determine when to activate these partners. Some LTC partners can handle Pfizer vaccine, although throughput is likely to be less than that of retail pharmacies, so jurisdictions should consider this when determining when to activate partners.

Federal LTC Pharmacy Partner Points of Contact:
