Use this guidance and materials for Moderna COVID-19 Vaccine products including:

**MONOVALENT**
- **Ages: 6 months through 5 years** (blue capped vial with magenta-bordered label)
- **Ages: 6 through 11 years** (blue capped vial with purple-bordered label)
- **Ages: 12 years and older** (red capped vial with blue-bordered label)

**BIVALENT**
- **Ages: 18 years and older** (blue capped vial with gray-bordered label)

- Store between -50°C and -15°C (-58°F and 5°F) until the expiration date
- Protect from light

- Store between 2°C and 8°C (36°F and 46°F) for up to 30 days.
- Protect from light

**Best Practices**

All Moderna COVID-19 Vaccine products can be:

- Stored at frozen temperatures until the expiration date. Use storage labels to help staff easily identify the correct product (monovalent or bivalent) based on the recipient's age.
- Stored at refrigerated temperatures for up to 30 days. Use these tracking labels to identify when the beyond-use date for refrigerated storage has been reached. Vaccine should NOT be used after this date.
- Transported in a portable freezer, refrigerator or container qualified to maintain the appropriate temperatures with a digital data logger to monitor the temperature for up to 12 cumulative hours. See Transporting Moderna COVID-19 Vaccines for detailed guidance.

Additional information on storing and handling Moderna COVID-19 Vaccine can be found in:

- Moderna Storage and Handling Summary
- Moderna COVID-19 Transport Summary
- CDC’s Storage and Handling Toolkit
MONOVALENT Moderna COVID-19 Vaccine - Ages: 6 months through 5 years

**STORAGE LABEL**
Store vaccine between -50°C and -15°C (-58°F and 5°F) until the expiration date.
