Moderna COVID-19 Vaccine
Storage and Beyond-Use Date Tracking Labels

Use this guidance and materials for Moderna COVID-19 Vaccine products including:

- **MONOVALENT**
  - Ages: 6 months through 5 years
  - (blue capped vial with magenta-bordered label)

- **MONOVALENT**
  - Ages: 6 through 11 years
  - (blue capped vial with purple-bordered label)

- **MONOVALENT**
  - Ages: 12 years and older
  - (red capped vial with blue-bordered label)

- **BIVALENT**
  - Ages: 6 years and older
  - (blue capped vial with gray-bordered label)

---

### Best Practices

**All Moderna COVID-19 Vaccine products can be:**

- Stored at frozen temperatures until the expiration date. Use storage labels to help staff easily identify the correct product (monovalent or bivalent) based on the recipient’s age.

- Stored at refrigerated temperatures for up to 30 days. Use these tracking labels to identify when the beyond-use date for refrigerated storage has been reached. Vaccine should NOT be used after this date.

- Transported in a portable freezer, refrigerator or container qualified to maintain the appropriate temperatures with a digital data logger to monitor the temperature for up to 12 cumulative hours. See Transporting Moderna COVID-19 Vaccines for detailed guidance.

### Additional information on storing and handling Moderna COVID-19 Vaccine can be found in:
