ULTRA-COLD FREEZER

- Store between **-90°C and -60°C (-130°F and -76°F)** until the expiration date
- Protect from light

BIVALENT
Pfizer-BioNTech COVID-19 Vaccine

BEYOND-USE LABEL Store vaccine between **2°C and 8°C** (36°F and 46°F) for up to 10 weeks.

Ages: 12 years and older

Lot number(s): _____

Today's date: ____/____/____

Use by Date: ____/____/____

☐ **Multidose Vials** ☐ **Single-dose Vials**

 **BIVALENT VACCINE**

*Vaccine must be used within 10 weeks. Do NOT use after this date.

REFRIGERATOR

- Store between **2°C and 8°C (36°F and 46°F)** for up to 10 weeks.
- Protect from light

Best Practices

All Pfizer-BioNTech COVID-19 Vaccine products can be:

- Stored at ultra-cold frozen temperatures until the expiration date. Use storage labels to help staff easily identify the correct product based on the recipient's age.
- Stored at refrigerated temperatures for up to 10 weeks. Use these tracking labels to identify when the beyond-use date for refrigerated storage has been reached. Vaccine should NOT be used after this date.
- Transported in a portable ultra-cold freezer, refrigerator or container qualified to maintain the appropriate temperatures with a digital data logger to monitor the temperature for up to 12 cumulative hours. See Transporting Pfizer-BioNTech COVID-19 Vaccines for detailed guidance.

Additional information on storing and handling Pfizer-BioNTech COVID-19 Vaccine can be found in:
