Pfizer-BioNTech COVID-19 Vaccine
At-A-Glance

Guidance below summarizes basic storage, preparation, scheduling, administration, and dosage for ALL Pfizer-BioNTech COVID-19 Vaccine products.

Storage and Handling Basics
Find additional guidance on storing the vaccine properly at:
- Storage and Handling of Pfizer-BioNTech COVID-19 Vaccines | CDC
- Pfizer-BioNTech COVID-19 Vaccines | FDA
- Pfizer-BioNTech COVID-19 Vaccine | cvdvaccine.com
- Vaccine Storage and Handling Toolkit-Updated with COVID-19 Vaccine Storage and Handling Information

Ages: 6 months through 4 years
(Maroon capped vial and bordered label)

Ages: 5 through 11 years
(Orange capped vial and bordered label)

Ages: 12 and older
(GRAY capped vial and bordered label)

Monovalent Primary Series
Bivalent Booster Dose

Storage Temperature: Before Puncture

- Do NOT store vaccine in a standard freezer
- Do NOT refreeze thawed vaccine

Thawing Frozen Vaccine

- 2°C and 8°C (36°F and 46°F)
- OR
- Up to 25°C (77°F)
- Amount of time needed to thaw vaccine varies based on temperature and number of vials.

Storage Temperature: After 1st Puncture

- 2°C and 25°C (36°F and 77°F) for up to 12 hours.
- Discard vial and any unused vaccine after 12 hours.

Vaccine expires 12 months after the manufacture date on the vial. Use Pfizer-BioNTech expiration date tool at lotexpiry.cvdvaccine.com

- **Ages**: 6 months through 4 years, 5 through 11 years, 12 years and older
- **Diluent**: Use sterile 0.9% sodium chloride (normal saline, preservative-free) included in the ancillary supply kit. Do not use bacteriostatic 0.9% sodium chloride or any other diluent.
- **Beyond-use date/time**: After mixing with diluent, use within 12 hours.

* Diluent: Use sterile 0.9% sodium chloride (normal saline, preservative-free) included in the ancillary supply kit. Do not use bacteriostatic 0.9% sodium chloride or any other diluent.

Administration
- **COVID-19 vaccine** may be administered at the clinical visit as other vaccines.
- **Do NOT** “pool vaccine” from more than 1 vial to obtain a dose. If a full dose cannot be withdrawn, discard the vial and any remaining vaccine.

† The deltoid muscle in the upper arm may be used if the muscle mass is adequate.
‡ Vastus lateralis muscle in the anterolateral thigh may be used.
Scheduling Doses

Graphics below provide an overview for the number of doses of vaccine based on the type of dose (primary versus booster), recipient’s age and health status. Review [CDC’s Interim COVID-19 Immunization Schedule](https://www.cdc.gov/vaccines/schedules/hcp/interim-covid-19.html) for detailed clinical guidance when scheduling doses.

**For Most Persons**

- **Pfizer-BioNTech (ages 6 months–4 years)**
  - PRIMARY
  - In 3-8 weeks
  - PRIMARY
  - In at least 8 weeks
  - PRIMARY

- **Pfizer-BioNTech (Ages 5 years and older)**
  - PRIMARY
  - In 3-8 weeks
  - PRIMARY
  - In at least 2 months
  - BIVALENT mRNA BOOSTER*

**For Moderately or Severely Immunocompromised Persons**

- **Pfizer-BioNTech (ages 6 months–4 years)**
  - PRIMARY
  - In 3 weeks
  - PRIMARY
  - In at least 8 weeks
  - PRIMARY

- **Pfizer-BioNTech (ages 5 years and older)**
  - PRIMARY
  - In 3 weeks
  - PRIMARY
  - In at least 4 weeks
  - PRIMARY
  - In at least 2 months
  - BIVALENT mRNA BOOSTER*

* Administer an age-appropriate mRNA bivalent booster (i.e., Pfizer-BioNTech for people age 5 years and either Pfizer-BioNTech or Moderna for people ages 6 years and older). For people who previously received a monovalent booster dose(s), the bivalent booster dose is administered at least 2 months after the last monovalent booster dose.
