

Stop serious childhood diseases in their tracks like you do your curious explorer.

**Put up a wall of protection with safe, proven vaccines.** Giving your baby the recommended immunizations by age two is the best way to protect him from 14 vaccine-preventable diseases, like whooping cough and measles. For more reasons to vaccinate, talk to your child's doctor or go to [www.cdc.gov/vaccines](http://www.cdc.gov/vaccines) or call **1-800-CDC-INFO**.

**Immunization. Power to Protect.**
