

Stop serious childhood diseases in their tracks like you do your curious explorer.

Put up a wall of protection with safe, proven vaccines. Giving your baby the recommended immunizations by age two is the best way to protect him from 14 vaccine-preventable diseases, like whooping cough and measles. For more reasons to vaccinate, talk to your child's doctor or go to www.cdc.gov/vaccines or call 1-800-CDC-INFO.

Immunization. Power to Protect.
