

Temperature Monitoring Best Practices for **Frozen Vaccines—Fahrenheit (F)**

1 Thermostat should be at the factory-set or midpoint temperature setting

2 Record daily temperatures

3 steps, 2 times a day: Read and record temperatures first thing in the morning and before leaving at night.

- 1 Current temperature:** The temperature in the freezer right now
- 2 Min/Max:** The coldest and warmest temperatures in the freezer since you last reset the thermometer
- 3 Reset:** The button you push after you have recorded the Min/Max temperatures

Best Practices

3 Take action if out of range!

- Contact your state or local health department immediately. Or for private vaccine, call the manufacturer directly.
- Tell them the total amount of time the freezer temperature was out of range.
- **Take your time.** Read and record temperatures accurately.
- **Make your mark!** Initial the log when recording temperatures.
- **Leave it blank.** If a temperature was not recorded, leave the space blank!

CS243541-B Revision March 2017

Test Your Knowledge

Review the temperature readings below and select the correct answer.

1

- A. Current temp and min/max are within range—no action necessary
- B. Current temp is within range, min/max out of range—take action
- C. Current temp is within range, min/max out of range—no action necessary
- D. Current temp and min/max are out of range—take action

2

- A. Current temp and min/max are within range—no action necessary
- B. Current temp is within range, min/max out of range—take action
- C. Current temp is within range, min/max out of range—no action necessary
- D. Current temp and min/max are out of range—take action

3

- A. Current temp and min/max are within range—no action necessary
- B. Current temp is within range, min/max out of range—take action
- C. Current temp is within range, min/max out of range—no action necessary
- D. Current temp and min/max are out of range—take action

4

- A. Current temp and min/max are within range—no action necessary
- B. Current temp is within range, min/max out of range—take action
- C. Current temp is within range, min/max out of range—no action necessary
- D. Current temp and min/max are out of range—take action

5

“Take action” means (circle any that apply)

- A. Call the state/local VFC program (or manufacturer for private vaccine) for guidance.
- B. Notify the practice’s vaccine coordinator to get the freezer temperature back in range.
- C. Remove all vaccines that are out of range and discard them.
- D. Discard any vaccine that does not look frozen.
