We believe that getting vaccinated is a critical step in protecting your health. Vaccines can help prevent common diseases that can be serious and costly for you or your loved ones.

Each year, thousands of adults in America suffer serious health problems (and some even die) from diseases they could be vaccinated against like whooping cough, hepatitis A and B, flu and pneumococcal diseases, and shingles. Older adults and those with chronic health conditions are at increased risk for complication from certain diseases.

Together, let’s take an active role in helping you and your loved ones stay healthy. To learn more about vaccines for adults, visit [www.cdc.gov/vaccines/adults](http://www.cdc.gov/vaccines/adults) or take a quick vaccine quiz at [www.cdc.gov/vaccines/adultquiz](http://www.cdc.gov/vaccines/adultquiz).

Please take a moment to fill out the questionnaire below to help us determine which vaccines may be recommended for you based on your specific health status, age, and lifestyle. Keep in mind that this list may not include every vaccine you need.

| □ I have type 1 or type 2 diabetes | • Hepatitis B vaccine series  
• Pneumococcal polysaccharide vaccine |
| □ I have a weakened immune system | • Both types of pneumococcal vaccines (one dose of conjugate first, then one dose of polysaccharide ≥8 weeks later)  
• HPV vaccine series (if 26 years of age or younger and not previously vaccinated)  
• Hib vaccine (post-hematopoietic stem cell transplant only) |
| □ I have HIV | • Hepatitis B vaccine series  
• Both types of pneumococcal vaccines (one dose of conjugate first, then one dose of polysaccharide ≥8 weeks later)  
• HPV vaccine series (if 26 years of age or younger and not previously vaccinated) |
| □ I have chronic liver disease | • Hepatitis A vaccine series  
• Hepatitis B vaccine series  
• Pneumococcal polysaccharide vaccine |
| □ I do not have a spleen or my spleen does not work well | • Hib vaccine  
• Meningococcal vaccine  
• Both types of pneumococcal vaccines (one dose of conjugate first, then one dose of polysaccharide ≥8 weeks later) |
| □ I am a man who has sex with men | • Hepatitis A vaccine series  
• Hepatitis B vaccine series  
• HPV vaccine series (if 26 years of age or younger and not previously vaccinated) |
| □ I am a laboratory worker and may be routinely exposed to isolates of *Neisseria meningitidis*, or specimens potentially containing hepatitis A or hepatitis B virus | • Hepatitis A vaccine series  
• Hepatitis B vaccine series  
• Meningococcal vaccine |
| □ I am a college freshman living in a residence hall | • Meningococcal vaccine  
• Measles, mumps, rubella (MMR) vaccine* |
| □ I am planning to travel out of the U.S. | • Talk to your healthcare professional to learn which vaccines you may need based on locations of travel. |

*This is a live vaccine and should not be given to people who have a very weakened immune system, including those with a CD4 count less than 200, or to pregnant women.*
