\*Data are presented only for non-Hispanic whites, non-Hispanic blacks, and Hispanics because numbers for other racial/ethnic groups were too small for meaningful analysis. Persons of Hispanic origin can be of any race; however, the racial/ethnic groups non-Hispanic white and non-Hispanic black do not include persons of Hispanic origin.

<sup>†</sup>Confidence interval. 95% CIs were calculated by multiplying the standard error by ±1.96.

<sup>§</sup>The standard of reliability is RSE <0.3 (where RSE = the ratio of the standard error and the prevalence). This estimate did not meet that standard, or the denominator was <30.

<sup>¶</sup>Meets the standard of reliability; however, <50 respondents were in the denominator.
